The accelerated development of the White queen's bishop after 1 d4 Nf6 2 Bg5 was for many years considered a bizarre chess opening, practiced only by a few "eccentric" chess players scattered around the globe, including the Brazilian Octavio Trompowsky, after whom the variation was named. Then in the 1990s, after a chance discovery, the young English grandmaster, Julian Hodgson, started to play it on the UK and international chess circuit with dramatic success, scoring many short wins with dashing attacking play. By force of example, the opening then saw a rapid increase in popularity; in fact, it is now regarded as "mainline" theory. Players interested in mastering this move will find here a thorough survey of the development and latest trends in this exciting opening, together with illustrative games. A must for any Competitive player.

The Caro-Kann is one of Black's most reliable answers to 1.e4. It is a regular favourite of elite players, who know that computer-aided preparation now threatens the sharpest lines of the Sicilian or Ruy Lopez (at the very least with a forced draw). The Caro-Kann is less susceptible to such forcing lines -- Black sets out to equalise in the opening, and win the game later. Lars Schandorff reveals a bullet-proof opening repertoire and lucidly explains how Black should play the middle and endgame. Features: A complete repertoire against 1.e4 with 1...c6; Written by an eminent opening expert; A rock-solid grandmaster repertoire.

The Caro-Kann Defence, long renowned for being a solid and reliable defence against 1.e4, is undergoing a renaissance at the moment. In addition to being a mainstay in the repertoires of a recent World Champion (Viswanathan Anand) and a 2018 World Championship candidate (Ding Liren), it is being flooded with new and creative ideas from a range of other top players, notably Anand's Indian Olympiad teammates Vidit and Adhiban. The pawn structures in this opening leave considerable room for individual interpretation. This book is written for the Black side, though new ideas for White are suggested and old ones occasionally improved. It contains not only the author's personal take on how to deal with all major White tries after 1.e4 c6, but also a range of alternatives for Black- to cater for different types of Caro-Kann player. This repertoire builds on the existing state of theory, taking it in novel, exciting and decidedly modern directions, while not forgetting about the opening's sound strategic underpinnings.
