The Fashion Designer's Textile Directory Prentice Hall

Prior to the 1970s and 1980s, fashion marketing focused heavily (and perhaps solely) on women's fashions. Today, fashion marketing influences all products and how consumers use these products. How products are marketed, when products are marketed, the evolution of products into different sizes, shapes, colors, and uses are all influenced by fashion marketers. Fashion marketing is taken to different levels from branding a person (e.g., Ralph Lauren, the person), a line of products (e.g., Lexus luxury cars), or a single product (e.g., Coach handbag). This much-needed text introduces new methods and technologies to apply today's principles to future practices of fashion marketing.

Weaving as a subject is an integral part of any textile engineering/technology program, the others being fibre manufacturing, yarn manufacturing and textile chemical processing. This book amalgamates both the compartments (preparatory processes and the loom mechanism) of weaving technology and presents a holistic picture. The machine descriptions are presented from the viewpoint of principles and no attempt has been made to make them exhaustive by incorporating various models or variants. The mathematical relations among various parameters have been derived starting from the first principles and each chapter concludes with solved numerical examples.
