DESTINEY ROBERSON

A Walk Through Leadership Indiana University Press

No one would have believed that in the last years of the nineteenth century that this world was being watched... These words marked the beginning of H.G. Wells' classic science fiction novel *The War of the Worlds*...and marked the end of man's child-like belief that we are alone in the universe. Published in 1898, *The War of the Worlds* is one of the greatest works of science fiction ever written, and it cemented H.G. Wells' legacy as a founding father of science fiction. A 1938 radio play by Orson Welles caused mass panic when it hit the airwaves, and frankly we haven't been able to trust aliens ever since. Here now, are bold new visions of Alien and Human conflicts on many different fronts, including: A man scours a distant world searching for something right under his nose...Two children terrorized by their own mother find an unlikely saviour...Giant war machines find love and more at the end of the world...A harmless looking birthday gift is really a portal to humanity's doom... Looking for great horror and science fiction? GET IN LINE. *War of the Worlds: Frontlines*

A Reprint of W. Shakespeare Morton Publishing Company

This edited collection examines conflicting assumptions, expectations, and perceptions of maternity in artistic, cultural, and institutional contexts. Over the past two decades, the maternal body has gained currency in popular culture and the contemporary art world, with many books and exhibitions foregrounding artists' experiences and art historical explorations of maternity that previously were marginalized or dismissed. In too many instances, however, the maternal potential of female bodies—whether realized or not—still causes them to be stigmatized, censored, or otherwise treated as inappropriate: cultural expectations of maternity create one set of prejudices against women whose bodies or experiences do align with those same expectations, and another set of prejudices against those whose do not. Support for mothers in the paid workforce remains woefully inadequate, yet in many cultural contexts, social norms continue to ask what is “wrong” with women who do not have children. In these essays and conversations, artists and writers discuss how maternal expectations shape both creative work and designed environments, and highlight alternative ways of existing in relation to those expectations.

Embracing Contraries Prentice Hall

Peterson's Two-Year Colleges 2014 includes information on more than 1,900 accredited two-year undergraduate institutions in the United States and Canada, as well as some international schools. It also includes detailed two-page descriptions written by admissions personnel. College-bound students and their parents can research community and two-year colleges and universities for information on campus setting, enrollment, majors, expenses, student-faculty ratio, application deadline, and contact information. You'll also find helpful articles on what you need to know about two-year colleges: advice for adult students on transferring and returning to school ; how to survive standardized tests; what international students need to know about admission to U.S. colleges; how to manage paying for college; and interesting “green” programs at two-year colleges, and much more.

A Tiger in the Bedroom Penguin

A Walk Through Leadership is aimed at leaders and potential leaders in higher education (particularly community colleges), but most of these principles are universal and would be applicable for any leadership situation. While many leadership books are dry and make little effort to help the reader internalize the concepts, this book overcomes this problem by using familiar metaphors and is written as a narrative and a dialogue in a spirit similar to *Tuesdays With Morrie*. The first part of the book is a series of discussions between a woman embarking on a leadership position and her retired grandfather who had years of experience, as they take walks together. The second part continues those discussions and those walks later in the woman's career as she is about to assume the role of college president. Although written in two parts, all of the content is equally useful to readers no matter where they are in their leadership career.

Book of Majors 2014 Cytogenetic Abnormalities

How can it be that 50 years after the passage of the Civil Rights Act, our institutions of higher education have still not found ways of reducing the higher education gaps for racial and ethnic groups? That is the question that informs and animates the Equity Scorecard model of organizational change. It shifts institutions' focus from what students do (or fail to do) to what institutions can

do—through their practices and structures, as well as the actions of their leaders and faculty—to produce equity in outcomes for racially marginalized populations. Drawing on the theory of action research, it creates a structure for practitioners to become investigators of their own institutional culture, to become aware of racial disparities, confront their own practices and learn how things are done on their own turf to ask: In what ways am I contributing to equity/inequity? The Equity Scorecard model differs significantly from traditional approaches to effecting change by creating institutional teams to examine and discuss internal data about student outcomes, disaggregated by race and ethnicity. The premise of the project is that institutional data acts as a powerful trigger for group learning about inequities in educational outcomes, and that the likelihood of improving those outcomes increases if the focus is on those things within the immediate control of the participating leaders and practitioners. Numerous institutions have successfully used The Equity Scorecard's data tools and processes of self-reflection to uncover and document the behaviors and structures that lead to failure to retain and graduate students from diverse racial and ethnic backgrounds with a history of unequal opportunity; and to create the climate for faculty and staff to take ownership of the issues and develop sustainable practices to eliminate racial disparities in academic performance. The Scorecard can be used at a small-scale to analyze individual courses or programs, as well as broader institutional issues. This book presents the underlying concept of funds of knowledge for race-conscious expertise that informs this process, describes its underlying theories; defines the attributes needed to achieve equity-minded practice; demonstrates, through examples of implementation, what different institutions have learned, and what they have achieved; and provides a blueprint for action for higher education as a whole. For college leaders, instructors and support staff who feel the pressure—moral or otherwise—to close the racial equity gap that their institutions produce year after year, this book provides the structure, knowledge and tools to do so. It is also of value to scholars and students of higher education who have an interest in the study of organizational change.

Exploring Biology in the Laboratory: Core Concepts Random House Trade Paperbacks

A comprehensive reference to today's academic programs provides in-depth descriptions of more than 1,100 majors while listing 3,800 colleges that offer profiled undergraduate and graduate degrees, sharing additional insights into how specific majors can translate into careers. Original. 40,000 first printing. **Mastering Celtx** WorthyKids

[This book] presents a compendium of carnal curiosities from the animal kingdom ... it explores the many parallels between human and animal courtship. Each of the more than 200 paragraph-length lessons includes a bit of witty advice for the love lorn.

DK Guide to Public Speaking Delacorte Books for Young Readers

Since ancient times, one question has endured in the hearts and minds of children: Why do I have to make my bed if it's just going to get messed up again? Now, Wade Bradford takes readers on a trip through time for a humorous look at how bed-making has evolved throughout history. Using examples of household tasks that might have been performed in colonial America, in ancient Egypt, by Vikings, and so on, this clever examination of chore lore eventually reveals the answer to this age-old question. (Hint: Mothers throughout history have always had a ready response.) This book makes history so much fun, kids won't even realize they're learning.

Mexicanos John Wiley & Sons

This book provides a general introduction to the biological and evolutionary bases of religion and is suitable for introductory level courses in the anthropology and psychology of religion and comparative religion. Why did human ancestors everywhere adopt religious beliefs and customs? The presence and persistence of many religious features across the globe and time suggests that it is natural for humans to believe in the supernatural. In this new text, the authors explore both the biological and cultural dimensions of religion and the evolutionary origins of religious features.

What Your Atheist Professor Doesn't Know (But Should) Peterson's This market-leading text emphasizes future consumers of psychological research, uses real-world examples drawn from popular media, and develops students' critical-thinking skills as they become systematic interrogators of information in their everyday lives.

Research Methods in Psychology Pearson College Division

This empowering study on human diversity helps readers develop the ability to understand, respect, and value diversity—i.e., raise

their “diversity consciousness”—and demonstrates how opening one's mind to the views of other peoples and cultures is central for a quality education and successful career. Personalizing the learning experience by weaving a wide variety of real-life student experiences and perspectives throughout the book, it discusses topics in a style that promotes self-reflection and dialogue, and uses an approach to diversity that is balanced, comprehensive, well-integrated, and relevant to achieving one's life goals. KEY TOPICS Complete with self-reflective journal questions and interactive exercises, it offers thorough and current discussions on diversity and workplace issues—what they are, their significance, and their relevance to the reader; discusses concepts such as teamwork, conflict management, leadership, racism, prejudice, and communication in a clear and concise fashion; and zeroes in on the relationship between an employee's success in the workplace and his/her ability to develop flexibility in their thinking so that he/she can positively and effectively deal with a variety of diversity issues. A useful guide to raising diversity consciousness.

Yoga and Body Image Simon and Schuster

A friendship unlike any other! After retiring from the circus, Tarra became the first resident of the Elephant Sanctuary in Tennessee. When other elephants moved in and developed close friendships, only Tarra remained alone—until the day she met a stray mixed-breed dog named Bella. From then on, the two were inseparable. Color photographs of Tarra and Bella at home in the Elephant Sanctuary deftly illustrate this inspiring story of inter-species companionship.

What Shamu Taught Me About Life, Love, and Marriage

Cambridge University Press

Along with the writings, "Rico and Mano provide a historical, social, cultural, and literary context for the readings. Informative chapter introductions, the inclusion of key laws and other contextual documents, and the chapters' focus on the experiences of a particular ethnic group all contribute to a deeper reading of the selections and a richer understanding of America's pluralistic society."--Cover.

From Our Land to Our Land Createspace Independent Pub *Exploring Biology in the Laboratory: Core Concepts* is a comprehensive manual appropriate for introductory biology lab courses. This edition is designed for courses populated by nonmajors or for majors courses where abbreviated coverage is desired. Based on the two-semester version of *Exploring Biology in the Laboratory*, 3e, this Core Concepts edition features a streamlined set of clearly written activities with abbreviated coverage of the biodiversity of life. These exercises emphasize

the unity of all living things and the evolutionary forces that have resulted in, and continue to act on, the diversity that we see around us today.

Private Secondary Schools 2014-2015 Llewellyn Worldwide

This book explores the many dialogues that exist between the arts and literacy. It shows how the arts are inherently multimodal and therefore interface regularly with literate practice in learning and teaching contexts. It asks the questions: What does literacy look like in the arts? And what does it mean to be arts literate? It explores what is important to know and do in the arts and also what literacies are engaged in, through the journey to becoming an artist. The arts for the purpose of this volume include five art forms: Dance, Drama, Media Arts, Music and Visual Arts. The book provides a more productive exploration of the arts-literacy relationship. It acknowledges that both the arts and literacy are open-textured concepts and notes how they accommodate each

other, learn about, and from each other and can potentially make education 'better'. It is when the two stretch each other that we see an educationally productive dialogic relationship emerge.

Two-Year Colleges 2014 Peterson's

Documents the journey of a Honduran teen who braved hardship and peril to reunite with his mother after she was forced to leave him behind and seek migratory work in the United States.

Mathematics Framework for California Public Schools

Muska/Lipman

People are drawn to places where geology performs its miracles: ice-cold spring waters gushing from the rock, mysterious caves which act as conduits for ancestors and divinities traveling back and forth to the underworld, sacred bodies of water where communities make libations and offer sacrifices. This volume presents a series of archaeological landscapes from the Iranian highlands to the Anatolian Plateau, and from the Mediterranean

borderlands to Mesoamerica. Contributors all have a deep interest in the making and the long-term history of unorthodox places of human interaction with the mineral world, specifically the landscapes of rocks and water. Working with rock reliefs, sacred springs and lakes, caves, cairns, ruins and other meaningful places, they draw attention to the need for a rigorous field methodology and theoretical framework for working with such special places. At a time when network models, urban-centered and macro-scale perspectives dominate discussions of ancient landscapes, this unusual volume takes us to remote, unmappable places of cultural practice, social imagination and political appropriation. It offers not only a diverse set of case studies approaching small meaningful places in their special geological grounding, but also suggests new methodologies and interpretive approaches to understand places and the processes of place-making.
