Twelve-year-old Lilla Baxter-Willoughby doesn't lie. She's just a little bit...selective. To keep her parents happy, Lilla hides how much she hates moving back and forth between their houses, and she stomps down her doubts about that elite high school they're pushing her toward. To keep peace with her best friend Vivi, Lilla doesn't share that she got the junior camp counselor job that Vivi wanted. And even though—no, especially because—he seems into it, Lilla does

not tell the boy she grew up with about all the little sparks that flared up inside her the day she noticed his Suddenly Adorable Freckles. So when Vivi dares Lilla to start telling the truth as part of their Summer of Brave, Lilla hesitates. Because if she says out loud what she really wants, her whole life might crash down around her. And she doesn't need that. Except maybe she does.

This book examines contemporary research on

brain development and its relationship to learning and drawing. How does the process of making pictures contribute to the development of visual thinking? James offers an overview of how young children learn to draw and how to engage their visual intelligence through practical drawing exercises. He then offers examples of form drawing, portraiture, and the art and science of drawing for all ages and ability levels. The author also provides practical examples of geometric

and perspective drawing for teachers and adult students. Finally, he summarizes the importance of art and drawing in education and human development and adds an appendix on therapeutic drawing.

Can we improve the health and welfare of livestock while increasing production? Can we maintain animal biodiversity in the face of increasing demands for resources and expanding agriculture? Can we use animal behaviour to

reduce the carbon footprint of livestock production? Applied ethology is a young, multidisciplinary science that is relevant to these and other pressing issues. This book celebrates the history and science of applied ethology, and commemorates the 50th anniversary of the International Society for Applied Ethology. Through themes such as human-animal interaction, play behaviour, cognition, evolutionary theory and the relationship between applied ethology and

animal welfare science, the book examines why ethologists are so passionate about their work, and why this field remains more exciting now than ever. Chapter authors include world renowned ethologists such as Don Broom, Ian Duncan, Ruth Newberry, and many others. The history of the ISAE and development of the field is presented with engaging profiles of founding members and pioneers in the field. New methods and emerging issues in behaviour

research are discussed, along with the development of ethology around the globe. The book concludes with thoughts on future directions for applied ethology in addressing global issues of animal production, welfare, biodiversity, and the role of the ISAE. The book provides an exciting overview of this emerging field of science, and is intended for academics, students and anyone who takes pleasure in observing animals.

On 4 August 2012 Jessica Ennis kicked off what some described as the greatest night in British sporting history. For her it was the end of a long, winding, and sometimes harrowing road. Nobody was under more pressure at the London Olympics than 'the face of the Games'. Yet Jessica

delivered the heptathlon gold medal, and the huge outpouring of relief she showed afterwards hinted at the roller-coaster journey she had been on. Behind the smiles and politeness, Jessica has endured much. Bullied at school for being small, she proved to critics and rivals alike that size really didn't matter. Hers is an inspiring tale of following your dreams no matter what life throws at you. In 2008 Jessica thought her career might be over when she was injured on the eve of the Olympic

Games in Beijing. But she overcame this setback to rebuild her career and technique, becoming the world and European champion in successive years. Her biggest test was yet to come, though, when her rivals overhauled her in the build-up to London. Unbelievable is a refreshingly candid account of her rise to fame in a highly charged world in which body image issues and drug abuses lurk. From the unique pressures facing her, to behind-the-scenes

glimpses into the greatest show on earth, and a revealing account of her love-hate relationship with her long-term coach, Jessica reveals the truth behind the smiles for the first time. Unbelievable includes exclusive behind-the-scenes photos. This is the story of how the girl next door became London's poster girl, and how an ordinary woman used an extraordinary talent to claim the title of the world's greatest all-round female sports star.

"In Changing the Game: Title IX, Gender, and College Athletics, students learn how a dramatic change in American society began in a debate over college athletics. As students wrestle with questions of gender parity and the

place of athletics in higher education, they learn about the implementation - and implications - of legal change in the United States. The game is set at a fictional university in the mid-1990s. A debate over the role of athletics quickly expands to encompass demands that women's sports and athletes receive more resources and opportunities. The result is a firestorm of controversy on and off campus. Drawing on congressional testimonies from the Title IX hearings,

players advance their views in student government meetings, talk radio shows, town meetings, and impromptu rallies"--

The Road to Personal and Professional Success

Rudolf Steiner Press

The first comprehensive biography of the legendary figure who defined excellence in American sports: Jim Thorpe, arguably the greatest all-around athlete the United States has ever seen. With clarity and a fine eye for detail, Kate Buford traces

the pivotal moments of Thorpe's incomparable career: growing up in the tumultuous Indian Territory of Oklahoma; leading the Carlisle Indian Industrial School football team, coached by the renowned "Pop" Warner, to victories against the country's finest college teams; winning gold medals in the 1912 Olympics pentathlon and decathlon; defining the burgeoning sport of professional football and helping to create what would become the National Football League;

and playing long, often successful—and previously unexamined—years in professional baseball. But, at the same time, Buford vividly depicts the difficulties Thorpe faced as a Native American—and a Native American celebrity at that—early in the twentieth century. We also see the infamous loss of his Olympic medals, stripped from him because he had previously played professional baseball, an event that would haunt

Thorpe for the rest of his life. We see his struggles with alcoholism and personal misfortune, losing his first child and moving from one failed marriage to the next, coming to distrust many of the hands extended to him. Finally, we learn the details of his vigorous advocacy for Native American rights while he chased a Hollywood career, and the truth behind the supposed reinstatement of his Olympic record in 1982. Here is the story—long overdue and brilliantly

told—of a complex, iconoclastic, profoundly talented man whose life encompassed both tragic limitations and truly extraordinary achievements.
