<u>A Photographic Atlas for Anatomy & Physiology</u> Oxford University Press	
From Charles Dickens's Oliver Twist to George Sims's How the Poor Live, illustrated accounts of poverty were en vogue in Victorian Britain. Poverty was also a popular subject on the screen, whether in dramatic retellings of well-known stories or in 'documentary' photographs taken in the slums. London and its street life were the preferred setting for George Robert Sims's rousing ballads and the numerous magic lantern slide series and silent films based on them. Sims was a popular journalist and dramatist, whose articles, short stories, theatre plays and ballads discussed overcrowding, drunkenness, prostitution and child poverty in dramatic and heroic episodes from the lives and deaths of the poor. Richly illustrated and drawing from many previously unknown sources, Pictures of Poverty is a comprehensive account of the representation of poverty throughout the Victorian period, whether disseminated in newspapers, illustrated books and lectures, presented on the theatre stage or projected on the screen in magic lantern and film performances. Detailed case studies reveal the intermedial context of these popular pictures of poverty and their mobility across genres. With versatile author George R. Sims as the starting point, this study explores the influence of visual media in historical discourses about poverty and the highly controversial role of the Victorian state in poor relief.

Every generation reinvents Shakespeare for its own needs, imagining through its particular choices and emphases the Shakespeare that it values. The man himself was deeply involved in his own kind of historical reimagining. This collection of essays examines the playwright's medieval sources and inspiration, and how they shaped his works. With a foreword by Michael Almereyda (director of the Hamlet starring Ethan Hawke) and dramaturge Dakin Matthews, these thirteen essays analyze the ways in which our modern understanding of medieval life has been influenced by our appreciation of Shakespeare's plays.

Films for the Colonies examines the British Government's use of film across its vast Empire from the 1920s until widespread independence in the 1960s. Central to this work was the Colonial Film Unit, which produced, distributed, and, through its network of mobile cinemas, exhibited instructional and educational films throughout the British colonies. Using extensive archival research and rarely seen films, Films for the Colonies provides a new historical perspective on the last decades of the British Empire. It also offers a fresh exploration of British and global cinema, charting the emergence and endurance of new forms of cinema culture from Ghana to Jamaica, Malta to Malaysia. In highlighting the integral role of film in managing and maintaining a rapidly changing Empire, Tom Rice offers a compelling and far-reaching account of the media, propaganda, and the legacies of colonialism.

Early cinemas were noisy places with pianos, organs, ensembles of all varieties and sometimes full orchestras accompanied films. Britain, a key cultural player in the entertainment world both at the time and now, has a different history than the US of musical cultures and film production.

UK Hip-Hop, Grime and the City TwoMorrows Publishing

The potential of films to educate has been crucial for the development of cinema intended to influence culture, and is as important as conceptions of film as a form of art, science, industry, or entertainment. Using the concept of institutionalization as a heuristic for generating new approaches to the history of educational cinema, contributors to this volume study the co-evolving discourses, cultural practices, technical standards, and institutional frameworks that transformed educational cinema from a convincing idea into an enduring genre. The Institutionalization of Educational Cinema examines the methods of production, distribution, and exhibition established for the use of educational films within institutions—such as schools, libraries, and industrial settings in various national and international contexts and takes a close look at the networks of organizations, individuals, and government agencies that were created as a result of these films' circulation. Through case studies of educational cinemas in different North American and European countries that explore various modes of institutionalization of educational film, this book highlights the wide range of vested interests that framed the birth of educational and nontheatrical cinema.

Geoffrey Pearson, who died in 2013, was one of the outstanding social scientists of the post second world war era. His work spanned social work, social theory, social history, criminology and sociology. In particular, his work has had a huge impact upon studies of youth, youth culture and drugs. This collection is made up of contributions from scholars producing empirical work on some of the key areas upon which Geoff Pearson established his reputation. All of the writers in this

collection have been profoundly influenced by his scholarship. This collection focuses on urban ethnography, race and ethnicity, youth, and drugs. It includes chapters on: women working in male boxing gyms; understanding the English Defence League; Black male adults as an ignored societal group; drug markets and ethnography; and sex, drugs and kids in care. The result is a cutting edge collection that takes readers into social worlds that are difficult to access, complex, yet utterly normal. Overall this is an exciting and fittingly challenging tribute to one of the UKs most important scholars. This volume will appeal to scholars and students of criminology, sociology, social history and research methodology - in particular ethnography.

A Brief History of Film Indiana University Press

This book discusses British cinema's representation of the Great War during the 1920s. It argues that popular cinematic representations of the war offered surviving audiences a language through which to interpret their recent experience, and traces the ways in which those interpretations changed during the decade.

Life in Britain Between the Wars Routledge

In this epic history-cum-anthology, Megan Vaughan tells the story of the theatre blogosphere from the dawn of the carefully crafted longform post to today's digital newsletters and social media threads. Contextualising the key debates of fifteen years of theatre history, and featuring the writings of over 40 theatre bloggers, Theatre Blogging brings past and present practitioners into conversation with one another. Starting with Encore Theatre Magazine and Chris Goode in London, George Hunka and Laura Axelrod in New York, Jill Dolan at Princeton University, and Alison Croggon in Melbourne, the work of these influential early adopters is considered alongside those who followed them. Vaughan explores issues that have affected both arts journalism and the theatre industry, profiling the activist bloggers arguing for broader representation and better working conditions, highlighting the innovative dramaturgical practices that have been developed and piloted by bloggers, and offering powerful insights into the precarious systems of labour and economics in which these writers exist. She concludes by considering current threats to the

theatre blogosphere, and how the form continues to evolve in response to them.

Childhood and Cinema A Bibliography of British History, 1914-1989

In the history of cinema, many film genres have gained and lost popularity with the changing times, but one has maintained its supreme reign—the royal biopic. In *Royal Portraits in Hollywood: Filming the Lives of Queens*, authors Elizabeth A. Ford and Deborah C. Mitchell follow the lives of historical queens as depicted on film from the 1930s to the present. Women as diverse as Catherine the Great, Cleopatra, Mary Stuart, and Marie Antoinette have been represented on the silver screen, dominating the masculine world of politics while maintaining their femininity. During

the golden age of American film, these roles gave Hollywood a means of portraying powerful women without threatening the patriarchal social order. Depictions of the lives of queens have progressed from idealized and romanticized portraits to the more personal, complex portrayals of modern Hollywood. By walking the line between fact and fiction, these royal portraits of queens reveal just as much our society as they do about the historical periods they represent. Audiences are drawn to the theaters year after year because the lives of queens promise good drama and attract some of the most talented actresses. The success of Hollywood's leading ladies in playing queens further solidifies the link between Hollywood royalty and authentic royalty. Actresses such as Bette Davis, Judy Dench, Helen Mirren, Elizabeth Taylor, and Greta Garbo have done more than influence the way we imagine historical queens—they also have changed how we perceive women

in powerful positions today. *Royal Portraits in Hollywood* analyzes seventy-five years of films about queens as well as the lives of the actresses who starred in them. Combining biographical sketches and excerpts from letters and journals, Ford and Mitchell show how filmmaking and our society's perceptions of gender have changed. The authors compare Hollywood's on-screen portrayals to the historical records, often drawing connections to the actresses' careers and personal lives. This comprehensive analysis provides a more complete picture of the lives that take place behind the thrones—both real and fictional. The spectacle of a woman dressed in the full regalia of power remains a compelling image in our society. Hollywood actresses and the queens they portray are women who wield power, and by examining the lives of these women, the authors reveal not only society's perceptions about female power but also how those perceptions continue to evolve.
