Outlining the controversies that have surrounded the academic discipline of English Literature since its institutionalization in the late nineteenth century, this important book draws on a range of archival sources. It addresses issues that are central to the identity of academic English - how the subject came into existence, and what makes it a specialist discipline of knowledge - in a manner that illuminates many of the crises that have affected the development of modern English studies. By the end of the twentieth century, Freemasonry had acquired an unsavoury reputation as a secretive network of wealthy men looking out for each others' interests. The popular view is of an organisation that, if not actually corrupt, is certainly viewed with deep mistrust by the press and wider society. Yet, as this book makes clear, this view contrasts sharply with the situation at the beginning of the

century when the public's perception of Freemasonry in Britain was much more benevolent, with numerous establishment figures (including monarchs, government ministers, archbishops and civic worthies) enthusiastically recommending Freemasonry as the key to model citizenship. Focusing particularly on the role of the press, this book investigates the transformation of the image of Freemasonry in Britain from respectability to suspicion. It describes how the media projected a positive message of the organisation for almost forty years, based on a mass of news emanating from the organisation itself, before a change in public regard occurred during the later twentieth-century. This change in the public mood, the book argues, was due primarily to Masonic withdrawal from the public sphere and a disengagement with the press. Through an examination of the subject of Freemasonry and the British press, a number of related social trends are addressed, including the decline of deference, the erosion of privacy, greater competition in the media, the emergence of more aggressive and investigative journalism, the consequences of media isolation and the rise of professional Public Relations. The book also illuminates the organisation's collisions with nationalism, communism, and state welfare provision. As such, the study is illuminating not only for students of Freemasonry, but those with an interest in the wider social history of modern Britain.

Following on from the first volume, this book details the engrossing story of the two camera operators sent out to the Balkans by the American film producer Charles Urban, who had established his company in London in the early 20th century. The first of them, the Englishman Charles Rider Noble, filmed as many as 38 short living pictures in Bulgaria in 1903 and 1904. The second, the Scot John Mackenzie, travelled with his bioscope through Croatia, Montenegro, Bosnia and Herzegovina, Serbia, Bulgaria and Romania in 1905. Thus, thanks to the two Britons, the first sequences of films

depicting the landscapes, historical and archaeological monuments, architectural landmarks, cultural traditions and ethnographic features of the region, as well as some of its public events of the time, were shown in the peninsula. This book provides an exciting trip 'through savage Europe', tracing the amazing adventures of its 'main characters' and their life paths to their very end.

Therefore, it makes absorbing reading, while preserving its status as a unique scientific work, intended for film historians, early cinema researchers, film and television archives experts, college and university lecturers, students and schoolchildren. It will be of interest to everyone who, regardless of their age, loves the 'Seventh Art' and adores the secrets its early history still holds.

With the death of Mao Tse-tung and the subsequent purge of the "Gang of Four," China's new pragmatic leaders have embarked on a crash program of national development known as the Four Modernizations. This program is geared to the primary objective of turning China into a major world economic and military power by the year 2000. In this book, the outgrowth of a major international conference on China's post-Maoist development, ten distinguished analysts examine one of the core issues in China's current modernization drive: the acquisition and use of modern industrial science and technology. The authors address the politics of China's technological modernization, the institutional structure of technological research, the purchase of foreign technology, constraints on technological absorption, the growth potential of China's critical energy sector, and the modernization of China's military establishment. Supplemented with brief commentaries by leading academic, government, and private sector contributors, their chapters provide an in-depth look at the process, problems, and prospects of China's widely heralded technological revolution.

Protestant missionaries in Latin America. Colonial "civilizers" in the Pacific. Peace Corps Volunteers in Africa. Since the 1890s, thousands of American teachers--mostly young, white, middle-class, and inexperienced--have fanned out across the globe. *Innocents Abroad* tells the story of what they intended to teach and what lessons they learned. Drawing on extensive archives of the teachers' letters and diaries, as well as more recent accounts, Jonathan Zimmerman argues that until the early twentieth century, the teachers assumed their own superiority; they sought to bring civilization, Protestantism, and soap to their host countries. But by the mid-twentieth century, as teachers borrowed the concept of "culture" from influential anthropologists, they became far more self-questioning about their ethical and social assumptions, their educational theories, and the complexity of their role in a foreign society. Filled with anecdotes and dilemmas--often funny, always vivid--Zimmerman's narrative explores the teachers' shifting attitudes about their country and themselves, in a world that was more unexpected and unsettling than they could have imagined.

For centuries the common primrose has spread breathtaking carpets of pale lemon yellow across the globe. They are flowers of the field, hedgerow and meadow, and one of the most important garden flowers. Abundant, edible and beneficial for many ailments, they have supported civilization's social and cultural foundations. As harbingers of spring, they have captured the attention of gardeners, plant breeders and scientists, while artists

and poets have found them essential as both subject matter and muse; William Shakespeare introduced us to the 'the primrose path', a pleasurable but destructive route, in several of his plays, and Charles Darwin spent over 30 years working with primroses to solve an elegant evolutionary mystery. This is the story of how primroses became so successful, circling the Earth, adapting to human civilization, and yet holding their own on inaccessible craggy summits where they may never be seen. Bringing together stories, facts and folklore from around the world, this is a delightful guide to this hugely popular flower.

How punter power pulled the humble pint back from the brink, this is the surprising story of a very British consumer revolt! Following a cast of bloody-minded City bankers, hippie microbrewers, style gurus, a Python, and a lot of men in pubs, Brew Britannia tells the story of the campaign to revitalise the nation's beer which became the most successful consumer revolt in British history! Fifty years ago the future of British beer looked as bleak as the

weak, sweet, bland and fizzy pints being poured, as colossal combines took over the industry, closing local breweries and putting profit before palate. Yet today the number of breweries is at a post-war high, with over a thousand in operation, membership of The Campaign for Real Ale organisation (CAMRA) exploding in recent years with over 150,000 active members and exciting new developments brewing. In a barn in Somerset, plans are afoot to ferment a beer-cider hybrid with wild yeast that blows on the wind, while in Yorkshire an almost extinct style of 'salt 'n' sour' wheat beer is being resurrected for the 21st century. Whether you drink traditional, CAMRA-approved 'real ale' or prefer a super-strong, fruit-infused, barrel-aged Belgian-style 'saison', this astonishing story from the authors of popular beer blog Boak and Bailey will have you thirsty for more!
