In July 2011, South Sudan was granted independence and became the world's newest country. Yet just two-and-a-half years after this momentous decision, the country was in the grips of renewed civil war and political strife. Hilde F. Johnson served as Special Representative of the Secretary-General and Head of the United Nations Mission in the Republic of South Sudan from July 2011 until July 2014 and, as such, she was witness to the many challenges which the country faced as it struggled to adjust to its new autonomous state. In this book, she provides an unparalleled insider's account of South Sudan's descent from the ecstatic

celebrations of July 2011 to the outbreak of the disastrous conflict in December 2013 and the early, bloody phase of the fighting. Johnson's frequent personal and private contacts at the highest levels of government, accompanied by her deep knowledge of the country and its history, make this a unique eyewitness account of the turbulent first three years of the world's newest – and yet most fragile – country.

This beautifully illustrated catalogue accompanies the first major museum retrospective of the painter Norman Lewis (1909–1979). Lewis was the sole African American artist of his generation who became committed to issues of abstraction at the start of his career and continued to explore them over its entire trajectory. His art derived inspiration from music (jazz and classical) and nature (seasonal change, plant forms, the sea). Also central to his work were the dramatic confrontations of the civil rights movement, in which he was an active participant among the New York art scene. Bridging the Harlem Renaissance, Abstract Expressionism, and beyond, Lewis is a crucial figure in American abstraction whose reinsertion into the discourse further opens the field for recognition of the contributions of artists of color.

Bringing much-needed attention to Lewis's output and significance in the history of American art, *Procession* is a milestone in Lewis scholarship and a vital resource for future study of the artist and abstraction in his period. One of the main aspirations of the European Union (EU) is the development of a pan-European health system with unhindered access to quality care, in all member states. The PHAR-QA "Quality Assurance in European Pharmacy Education and Training" project explored the realities surrounding this idea in the area of pharmacy. This book assembles a series of papers, already published in the journal "Pharmacy," that describe the project: its origins, design, implementation, results, interpretation, and perspectives.

Since 2005, approximately 70,000 asylum-seeking refugees from Sudan and Eritrea have entered Israel. This, along with the highly publicised anti-African immigrant riots in Israel in 2012 and 2014 and the current global refugee crisis, has meant that the issue of African migration has become increasingly controversial. Here Gilad Ben-Nun looks at this phenomenon in its historical and contemporary contexts, and compares it to the wider debates surrounding the Palestinian refugees in the region and the concept of their right of return. He argues that this newer, African

migration issue has forced Israel to move from conceiving of itself as an 'exceptional' state and now has to view itself as a more 'normal' and 'universal' entity. Ranging as far back as Israel's important role in the the ratification drafting of the 1951 Refugee Convention and drawing on a variety of methodologies and sources, Ben-Nun offers a wide-ranging legal, social and historical examination of asylum in Israel, that sheds timely light onto themes of migration and identity across the Middle East. This is essential reading for legal historians and lawyers, as well as scholars working on migration studies and the history and politics of the Middle East.

The origins of the next radical economy is rooted in a tradition that has empowered people for centuries and is now making a comeback. A new feudalism is on the rise. While monopolistic corporations feed their spoils to the rich, more and more of us are expected to live gig to gig. But, as Nathan Schneider shows, an alternative to the robber-baron economy is hiding in plain sight; we just need to know where to look. Cooperatives are jointly owned, democratically controlled enterprises that advance the

economic, social, and cultural interests of their members. They often emerge during moments of crisis not unlike our own, putting people in charge of the workplaces, credit unions, grocery stores, healthcare, and utilities they depend on. Everything for Everyone chronicles this revolution--from taxi cooperatives keeping Uber at bay, to an outspoken mayor transforming his city in the Deep South, to a fugitive building a fairer version of Bitcoin, to the rural electric co-op members who are propelling an aging system into the future. As these pioneers show, co-ops are helping us rediscover our capacity for creative, powerful, and fair democracy.

Cultural keywords are words around which whole discourses are organised. They are culturally revealing, difficult to translate and semantically diverse. They capture how speakers have paid attention to the worlds they live in and embody socially recognised ways of thinking and feeling. The book contributes to a global turn in cultural keyword studies by exploring keywords from discourse communities in Australia, Brazil, Hong Kong, Japan, Melanesia, Mexico and Scandinavia. Providing new case

studies, the volume showcases the diversity of ways in which cultural logics form and shape discourse. The Natural Semantic Metalanguage (NSM) approach is used as a unifying framework for the studies. This approach offers an attractive methodology for doing explorative discourse analysis on emic and culturally-sensitive grounds. Cultural Keywords in Discourse will be of interest to researchers and students of semantics, pragmatics, cultural discourse studies, linguistic ethnography and intercultural communication.

In 1970, a group of people had what many commentators felt was a ludicrous dream, that politics in Northern Ireland 'should not be dominated by division, but should be about co-operation, partnership and reconciliation'. This dream was to become the Alliance Party of Northern Ireland. In the years since, this ambition to overcome tribal politics for a greater good has been preserved, through good times and bad. This book, the first full record of the development of the Alliance Party, charts that journey of hope and of history.

With a new look at the 1880s financial reforms in Japan, Steven J. Ericson's *Financial Stabilization in Meiji Japan* overturns widely held views of the program carried out by Finance Minister Matsukata Masayoshi. As Ericson shows, rather than constituting an orthodox financial-stabilization program—a sort of precursor of the "neoliberal" reforms promoted by the IMF in the 1980s and 1990s—Matsukata's policies differed in significant ways from both classical economic liberalism and neoliberal orthodoxy. The

Matsukata financial reform has become famous largely for the wrong reasons, and Ericson sets the record straight. He shows that Matsukata intended to pursue fiscal retrenchment and budget-balancing when he became finance minister in late 1881. Various exigencies, including foreign military crises and a worsening domestic depression, compelled him instead to increase spending by running deficits and floating public bonds. Though he drastically reduced the money supply, he combined the positive and contractionary policies of his immediate predecessors to pull off a program of "expansionary austerity" paralleling state responses to financial crisis elsewhere in the world both then and now. Through a new and much-needed recalibration of this pivotal financial reform, *Financial Stabilization in Meiji Japan* demonstrates that, in several ways, ranging from state-led export promotion to the creation of a government-controlled central bank, Matsukata advanced policies that were more in line with a nationalist, developmentalist approach than with a liberal economic one. Ericson shows that Matsukata Masayoshi was far from a rigid adherent of classical economic liberalism.

Holocaust Archaeologies: Approaches and Future Directions aims to move archaeological research concerning the Holocaust forward through a discussion of the variety of the political, social, ethical and religious issues that surround investigations of this period and by considering how to address them. It considers the various reasons why archaeological investigations may take place and what issues will be brought to bear when fieldwork is

suggested. It presents an interdisciplinary methodology in order to demonstrate how archaeology can (uniquely) contribute to the history of this period. Case examples are used throughout the book in order to contextualise prevalent themes and a variety of geographically and typologically diverse sites throughout Europe are discussed. This book challenges many of the widely held perceptions concerning the Holocaust, including the idea that it was solely an Eastern European phenomena centred on Auschwitz and the belief that other sites connected to it were largely destroyed or are well-known. The typologically , temporally and spatial diverse body of physical evidence pertaining to this period is presented and future possibilities for investigation of it are discussed. Finally, the volume concludes by discussing issues relating to the “re-presentation” of the Holocaust and the impact of this on commemoration, heritage management and education. This discussion is a timely one as we enter an age without survivors and questions are raised about how to educate future generations about these events in their absence.
