The Federal Reserve System, founded in 1913, is recognized as one of the most influential policy-making bodies in the United States. Its duties including managing the country's monetary policy, regulating and supervising banks, and monitoring the financial system, set it apart from other government agencies. Hafer provides a comprehensive explanation of the Federal Reserve System, describing its structure and process, policies, people, and key events. Arranged alphabetically, over 250 entries define and describe topics related to the Fed and United States monetary policy, including Alan Greenspan, Black Monday of

1929, Euro, Federal Reserve Act of 1913, Prime rate, and Treasury financing. Numerous appendices supplement the A-to- Z entries, providing insight into the secretive and powerful Federal Reserve Bank, the keepers of America's monetary system.

The Encyclopedia of Money A&C Black Business Information and Development

A comprehensive introductory resource with entries covering the development of money and the functions and dysfunctions of the monetary and financial system. The original edition of The Encyclopedia of Money won widespread acclaim for explaining the function—and dysfunction—of the financial system in a language any reader could understand. Now a decade later, with a more globally integrated, market-oriented world, and with consumers trying to make sense of subprime mortgages, credit default swaps, and bank stress tests, the Encyclopedia returns in an expanded new edition. From the development of metal and paper currency to the ongoing global economic crisis, the

rigorously updated The Encyclopedia of Money, Second Edition is the most authoritative, comprehensive resource on the fundamentals of money and finance available. Its 350 alphabetically organized entries—85 completely new to this edition—help readers make sense of a wide range of events, policies, and regulations by explaining their historical, political, and theoretical contexts. The new edition focuses most intently on the last two decades, highlighting the connections between the onrush of globalization, the surging stock market, and various monetary and fiscal crises of the 1990s, as well as developments, scandals, and pocketbook issues making headlines today.

Banking is a system of trading in money which involves safeguarding deposits and making funds available for borrowers. Banking developed in the Middle Ages in response to the growing need for credit in commerce. Finance is science of the management of money, banking, investments, and credit. Finance is the process of channelling funds from savers to users in the form of credit, loans, or invested capital through agencies including commercial banks, savings and loan associations, and such non-bank organisations as credit unions and investment companies. Insurance is a contract in which an individual or entity receives financial protection or reimbursement against losses from an insurance company. The company pools clients' risks to make payments more affordable for the insured. In a broad economic sense, insurance transfers risk from individuals to a larger group, which is better able to pay for losses. As Banking, Finance and Insurance is inter-related this Encyclopedia is designed in such a manner that it has terms of this Industry explained in a very easy manner. The work is designed to give readers direct insight into the main error sources occurring in their profession, especially those resulting from a poor understanding of the subject matter and the usage of particular terms to designate different concepts in different branches Banking and Insurance.
