DEVELOPMENTAL PSYCHOLOGY: CHILDHOOD and ADOLESCENCE

Springer Science & Business Media

This volume is an outgrowth of contemporary research on development over the adult lifespan, which by now has burgeoned and developed both nationally and internationally.

However, for us, the impetus to be involved in this area was spawned and nurtured by our initial association with the Society for Research in Adult Development (SRAD) with its origins some 15 years ago by Michael Commons and his associates in Cambridge,

Massachusetts.

Through the good will and support of this society, we also became, and are still, heavily involved with the Journal of Adult Development and the Kluwer-Plenum Monograph Series on Adult Development and Aging, of which this volume is a companion. Many of the contributions in the volume are from SRAD members, who consistently adhere to a focus on positive adult development. Their chapters have been complemented by pieces from other researchers, who have adopted more mainstream approaches to adult development and/or aging. Regardless of the particular approach and/or focus of the chapter, all

the work reported herein supports the relatively recent idea that development is not restricted to children and adolescents but continues throughout the adult lifespan in ways that we never envisioned some 20 years ago. Thus, the volume represents state-of-the-art theory, research, and practice on adult development, which has the potential to occupy us all for some time to come.

Topically organized, *Adult Development and Aging: Growth, Longevity and Challenges* provides students with a comprehensive understanding of the aging process in

adulthood from multiple perspectives. The authors use principles of lifespan development to show readers the directionality of changes in early, middle, and late adulthood. Within its framework of scientific literacy, the text charts four key themes to guide learners: a focus on aging as development; a global perspective on contexts; a vibrant, integrated approach to diverse coverage; and psychological science that translates into real-life experiences. A final chapter focuses on ways to improve the experience of aging for all adults. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers

access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides.

The new edition of the leading textbook on the biopsychosocial processes of aging in adults, fully revised and updated. *Adult Development and Aging* helps student readers understand the aging process both in themselves and in those around them.

Approaching the subject from the biopsychosocial perspective — an innovative model of adult development that takes into account the influences and interactions of complex biological, psychological, and

social processes — authors Susan Krauss Whitbourne and Stacey B. Whitbourne explore the latest concepts and applications in this exciting academic discipline. Based on Susan's classroom experience teaching her *Psychology of Aging* course, this engaging textbook integrates current research, real-world data, detailed explanations, and relatable examples to provide a balanced and accessible examination of the subject. This fully updated and revised seventh edition offers inclusive coverage of recent advances in neuroscience and genetics, cognitive functions, vocational development, sociocultural influences, mental

health issues, health and prevention, and much more.

"AgeFeeds" provide key information for each chapter, while new graphics, charts, tables, and figures enhance the text's visual appeal and strengthen student comprehension and retention. Acclaimed for its depth, currency, and student-friendly presentation, this popular textbook: Uses a multidisciplinary approach for understanding adult aging and development Offers positive images of aging and the newest and most relevant research in the field Provides new and updated illustrations, references, quizzes, examples, and research Offers practical self-help tips

and up-to-date links to online resources Includes extensive supplementary teaching and learning material including a test bank, PowerPoint slides, and an instructor's manual Adult Development and Aging: Biopsychosocial Perspectives, 7th Edition is an invaluable source of topically relevant information for traditional college-age learners and mature returning students alike, as well as for instructors and academic researchers in areas of adult aging and lifespan development. *Handbook of Emotion, Adult Development, and Aging* McGraw-Hill Humanities/Social Sciences/Languages Personal life narratives can serve as a rich source of new insights

into the experience of human aging. In this comprehensive volume, an international team of editors and contributors provide effective approaches to using biography to enhance our understanding of adult development. In addition to providing new theoretical aspects on aging and biography, the book also details new developments concerning the practical use of different biographical approaches in both research and clinical work. This is a landmark volume advancing the use of narrative approaches in gerontology.

"Julie Hicks Patrick,

Bert Hayslip, and Lisa Hollis-Sawyer's *Adult Development and Aging: Growth, Challenges, and Longevity* documents recent advances in the science of aging and summarizes the complexity of the field from multiple perspectives. The principles of lifespan development guide the text to show the multiple directionality of changes in early, middle and late adulthood. A multidisciplinary focus allows learners to bridge career, personal, and real world connections that matter. An appreciation for modern and historical research helps students to understand the trajectory of this relatively new scientific field's place in a global

context. Structured to follow a framework that promotes scientific literacy, the book supports learners as they evaluate and retain new information"--

*Adult Development and Aging* WCB/McGraw-Hill

For undergraduate courses in Adulthood and Aging, Gerontology, and Adult Development. This text provides an engaging perspective on the issues, challenges, and joys of adult development and aging. It provides a balanced and integrated treatment of young, middle, and later adulthood, concluding with a discussion of life satisfaction and quality of life issues. More than ever there is a need to inform those who will be therapists,

health care professionals, social workers, and all others who plan to work with adults in some capacity of the challenges and opportunities that often come our way in adulthood. In addition, this text covers areas which are often neglected, such as self development and individual differences, life-long learning, community and political life, and values and moral development. The addition of these and other topics, along with a positive-growth focused perspective sets this book apart from other textbooks in this area that have grown out of gerontology backgrounds with a focus on physical decline and illness. The pedagogical features of

the book direct students to key information, and the special features engage the reader in current ethical dilemmas and life-planning issues.

Abstract: A college textbook addresses modern views concerning societal and cultural factors, practices, and policies concerning a variety of aspects that are encountered in adult development and aging process.

Following an introductory section on developmental theory, age norms, and expectations, the remaining 10 chapters of the text are grouped among 4 principal themes: 1) family and work as primary roles

of adulthood; 2) continuity and changes with respect to intelligence, learning, creativity, adult sexuality, mental and physical health issues, longevity, death, and dying; 3) cultural variations and issues during aging, covering various ethnic groups; and 4) mechanisms for enhancing the adult years, including the US government's role in quality of life improvement. The developmental stages of early, middle, and late adulthood are each considered within each of the topics addressed. (wz).
