Houghton Mifflin Harcourt

A squirrel buries an acorn. A dolphin pushes a coconut into an ocean current. A camel chewing a date spits out the seed. What do they all have in common? Each one, in its own way, has helped to plant a tree. In myriad ways and diverse environments, Mother Nature is given a hand in dispersing seeds that eventually grow into trees. From the apple seeds falling off the sticky fur of a black bear to the pine seed carried by an army of ants marching to their anthill, creatures great and creatures small participate in nature's cyclical dance in the planting of a tree. Jerry Pallotta, author of more than 50 children's books, visits at least 150 schools each year. His book, *The Icky Bug Alphabet Book*, has sold more than one million copies. He is a contributor in Jon Scieszka's book, *Guys Write for Guys Read*. He lives in Needham, Massachusetts. Tom Leonard's children's book art combines a folk-art sophistication with a scientifically realistic interpretation. He was the illustrator for a collection of Margaret Wise Brown's previously unpublished poetry, *Under the Sun and the Moon*, winning praise in *School Library Journal* and

Publisher's Weekly. He lives in Philadelphia, Pennsylvania.

Tall Tall Tree is a tribute to the last remaining old-growth redwood forests that stand along the northern Californian coast. The perfect forest book for kids, Tall Tall Tree includes accurate scientific information about redwood trees and the habitat they create, making this book important for young readers at home and in the classroom. Tall Tall Tree is the

perfect California book for kids eager to learn about the state and its surrounding environment. With its counting format and rhyming text, this book doubles as a counting book for kids and young readers. There's a world teeming with life that very few people ever see. Take a peek at some of the animals that make their home in a Tall Tall Tree—a magnificent coast redwood. Count the animals, one through ten—chipmunks chattering, bats roosting, slugs sliding, and many more. Tony Frederick's playful rhyme makes this a book young children will want to look at and listen to again and again, while early readers will enjoy reading it on their own. The turn of every page reveals a unique perspective on the redwood's many moods, illustrated with Chad Wallace's stunning colors. Enriching STEAM activities complement the content. Come discover and explore this wild and magic world! Parents, teachers, gift givers, and many others will find: backmatter includes further information about redwood trees and the animals that live there An explore more section for teachers & parents includes STEAM activities and further learning websites A book for young readers learning how to count!

The Legend - Book 1 Purple House Incorporated

Celebrates the tree, one of the most useful plants on Earth.

The Giving Tree Booksurge Publishing

NEW YORK TIMES BEST SELLER • From the

world's leading forest ecologist who

forever changed how people view trees

and their connections to one another and

to other living things in the forest—a

moving, deeply personal journey of

discovery Suzanne Simard is a pioneer on

the frontier of plant communication and

intelligence; she's been compared to

Rachel Carson, hailed as a scientist who

conveys complex, technical ideas in a way

that is dazzling and profound. Her work

has influenced filmmakers (the Tree of

Souls of James Cameron's Avatar) and her

TED talks have been viewed by more than

10 million people worldwide. Now, in her

first book, Simard brings us into her world,

the intimate world of the trees, in which

she brilliantly illuminates the fascinating

and vital truths--that trees are not simply

the source of timber or pulp, but are a

complicated, interdependent circle of life;

that forests are social, cooperative

creatures connected through underground

networks by which trees communicate

their vitality and vulnerabilities with

communal lives not that different from our

own. Simard writes--in inspiring,

illuminating, and accessible ways—how

trees, living side by side for hundreds of

years, have evolved, how they perceive

one another, learn and adapt their

behaviors, recognize neighbors, and

remember the past; how they have

agency about the future; elicit warnings

and mount defenses, compete and

cooperate with one another with

sophistication, characteristics ascribed to

human intelligence, traits that are the

essence of civil societies--and at the

center of it all, the Mother Trees: the

mysterious, powerful forces that connect

and sustain the others that surround them.

Simard writes of her own life, born and

raised into a logging world in the

rainforests of British Columbia, of her days

as a child spent cataloging the trees from

the forest and how she came to love and

respect them—embarking on a journey of

discovery, and struggle. And as she writes

of her scientific quest, she writes of her own journey--of love and loss, of observation and change, of risk and reward, making us understand how deeply human scientific inquiry exists beyond data and technology, that it is about understanding who we are and our place in the world, and, in writing of her own life, we come to see the true connectedness of the Mother Tree that nurtures the forest in the profound ways that families and human societies do, and how these inseparable bonds enable all our survival.

Tree Or Three? Creative Teaching Press
Teach Your Children the Importance of Home."On a hill, there stood a tree. He felt lonely and bored and wanted to break free. "I wish I could fly up in the sky and see the world from above- from this place, I want to flee." When a magic swallow helps him to drag out his roots and fly, he finds himself up in the sky, looking down to the earth. What will he find, what will he see? And finally: Will he fly back home where he belongs? A vivid story about the importance of home and the place we love the most. For all children ages 3-7. The Book includes EXTRA pics to color.

The Music Tree Greenwillow Books
Kelvin and his Dad were taking a walk, looking at the trees and flowers in the park. When Kelvin asked his Dad ¿How do trees grow?¿ To which his dad replied, ¿Do you really want to know?¿ In this story, children will learn about the process of photosynthesis and why it is important to life on Earth. Look out for this and other titles in The Young Scientist Series of books which ¿Teaches Young Minds through Science and Rhymes¿.

Five Little Monkeys Sitting in a Tree

Planeoh Concepts Verlag
