DICKERSON FREEMAN

[Connected EBook] John Wiley & Sons

This undergraduate textbook adopts the perspective of organizations - not individuals - and clarifies the impact of social media on their different departments or disciplines, while also exploring how organizations use social media to create business value. To do so, the book pursues a uniquely multi-disciplinary approach, embracing IT, marketing, HR and many other fields. Readers will benefit from a comprehensive selection of current topics, including: tools, tactics and strategies for social media, internal and external communication, viral marketing campaigns, social CRM, employer branding, e-recruiting, search engine optimization, social mining, sentiment analysis, crowdfunding, and legal and ethical issues.

Making Smarter Marketing Decisions Wolters Kluwer Law & Business

Geisler argues that the value of science and technology for corporations, society, and the economy outweigh the negative impacts that inevitably arise. This remarkable new book shows that the benefits can be measured and evaluated, compiling all existing knowledge on the subject of assessment and including Geisler's own methods. The result is a compelling argument that science and technology has been, ultimately, a positive force for individuals, organizations, and nations.

A Fair Value Perspective Routledge

In terms of becoming a successful bioentrepreneur, there is still much more to learn. There are many ways to learn the essential fundamentals of entrepreneurship, including through the mistakes of previous businesses and models. Increased knowledge and a better understanding of what works can be derived from these previous failures and mistakes. Additionally, learning from other bioentrepreneurs can help businesses run successfully. By looking deeper into business models, product development, the fundamental concepts of bioentrepreneurship, and the essential characteristics of bioentrepreneurs, one can become better equipped to understand the role of biological sciences in entrepreneurship, specifically the role of product development. Bioentrepreneurship and Transferring Technology Into Product Development provides a comprehensive understanding of the role of biological sciences, specifically in transforming technology into commercial product. This book compiles the theoretical and practical aspects of bioentrepreneurship and discusses the various factors, including creating business plans, acquiring funding, and successful business models. The chapters also cover areas such as small-scale product development, intellectual property rights, funding schemes for start-ups, and new prospective biotechnology product development. This book is essential for bioentrepreneurs, entrepreneurs, product developers, scientists, practitioners, researchers, academicians, and students interested in product development from a biological science perspective.

Measuring and Managing the Value of Companies

Bloomsbury Publishing

This title is the Study Guide for the TOGAF® Business Architecture Part 1 Examination. It gives an overview of every learning objective for the TOGAF Business Architecture Syllabus and in-depth coverage on preparing and taking the TOGAF Business Architecture Part 1 Examination. It is specifically designed to help individuals prepare for certification. This Study Guide is excellent material for: • Individuals who require knowledge and understanding of TOGAF Business Architecture techniques; • Professionals who are working in roles associated with an architecture project such as those responsible for planning, execution, development, delivery, and operation; • Architects who are looking to achieve the TOGAF Business Architecture Level 1 credential; • Architects who want to specialize in development of a Business Architecture based on the TOGAF Standard, Version 9.2; It covers the following topics: • Business Modeling • Business Capabilities • Value Streams • Information Mapping • TOGAF Business Scenarios and how to apply them in development of a Business Architecture based on the TOGAF Standard, Version 9.2. A prior knowledge of Enterprise Architecture is advantageous but not required. While reading this Study Guide, the reader should also refer to the TOGAF Standard, Version 9.2 documentation (manual), available as hard copy and eBook, from www.vanharen.net and online booksellers, and also available online at www.opengroup.org.

Business Analysis Based on BABOK® Guide Version 2 – A Pocket Guide Irwin Professional Publishing

Whether you own a small business or work for a large corporation—whether you are looking for help making financial and business decisions—this book is for you. Business Analysis with Microsoft® Excel, Third Edition, provides in-depth information that will streamline your use of the tools within Excel. Professional advice and guidance from an experienced author provide the answers to your most pressing questions: • What's the relationship between my cost of goods sold and my inventory? • How do I get Excel to keep these values up-to-date on my income statement and my balance sheet? • I have to track service quality over time. How can I automate that using Excel charts? • How can I forecast future demand for my products, based on prior sales results? • What's the difference between financial leverage and operating leverage? How do I calculate them using my financial records? • I need to project my financials for next year. Does Excel have a tool for that? What do I need to know to use it effectively? • How do I do all these things using the new Ribbon in Excel 2007? • What are the best ways to automate a connection between Excel and an external database? Category Spreadsheets Covers Applicable for versions of Microsoft Excel 97 to 2007 User Level Intermediate-Advanced More great stuff... is just a click away! • Sample journals and ledgers; examples of trial balances, income statements, and balance sheets • Custom functions, such as FIFO and LIFO, for inventory management • VBA routines that automate the creation of forecasts, quality control charts, and sales and marketing analysis • Statistical process control charts: P charts, X-and-S charts, X-and-MR charts • Forecasting tools: Seasonal smoothing and ARIMA model identification quote from the front cover "Conrad takes the time to give the readers an easy-to-follow step-by-step understanding of the material, accompanied by clear illustrations, making this an excellent book to learn the material. I recommend this book to anyone wanting to gain more expertise in using and manipulating business data from within Excel." –Bob Umlas, Excel MVP

Analysis and design of value production strategies and business models in the telecommunications industry John Wiley & Sons

"This reference book brings together various perspectives on the usage and application of mobile technologies and networks in global business"--Provided by publisher.

Business Analysis with Microsoft Excel. (Adobe Reader) Van Haren Networks of firms have been in the focus of management research for several years. Recently, special attention has been paid to so-called business webs. Business webs are networks of firms which provide complements to a common product architecture. In the past, research focused on management issues of such webs but neglected the important question of how they actually came into being. The present book explicitly examines the formation and early growth of business webs. The author illustrates the early growth phases with two in-depth cases of the formation of the wireless internet ecosystem i-mode and the leading person-to-person online auction platform eBay. The book uncovers the contingencies under which the establishment of business webs is likely to succeed. Business researchers will benefit from the theoretical framework, while interested business managers will find explanations and advice for establishing a business web.

Creating Value with Science and Technology Cengage AU Business Valuation Discounts and Premiums SECOND EDITION Discounts and premiums do not just affect the value of a company; they play a crucial role in influencing a host of other factors and conditions that can make or break a deal. When it comes to business valuations, it's the business appraiser's responsibility to be intimately knowledgeable with every aspect of discounts and premiums: the different types, the situations when they may or may not apply, and how to quantify them. In this newly updated edition of Business Valuation: Discounts and Premiums, Shannon Pratt—one of the nation's most recognized and respected business valuation consultants—brings together the latest collective wisdom and knowledge about all major business discounts and premiums. Addressing the three basic approaches to conducting a valuation—the income approach, the market approach, and the asset approach—Shannon Pratt deftly and logically details the different discounts or premiums that may be applicable, depending on the basic valuation approach used, and how the valuation approaches used affect the level. Clearly written and thorough, Business Valuation: Discounts and Premiums, Second Edition provides business appraisers, accountants, attorneys, and business owners with an arsenal of

information for their professional toolkit that can be applied to every major evaluation case they might face in any deal. This updated edition features timely, comprehensive coverage on: Strategic acquisitions Extensive empirical data Pre-IPO marketability discount studies Merger and acquisition negotiations, empirical evidence from completed transactions, and positions taken by courts in litigations Strategic acquisition premiums Studies on minority discounts Detailed, authoritative, and complete in its coverage, Business Valuation: Discounts and Premiums, Second Edition gets to the core of one of the more complex challenges faced by business appraisers, and arms readers with the understanding and techniques needed to successfully meet and exceed their job expectations.

Creating Value with Big Data Analytics Springer Nature

Dominik Nußmann comprehensively analyzes the coinsurance effect of corporate diversification by first providing a structured review of all relevant findings presented in the financial economics and accounting literature. Based on this review, he examines important accounting and economic implications of the coinsurance effect by means of two comprehensive empirical analyses. In particular, he finds that diversified firms benefit from coinsurance through financial as well as accounting synergies which entail considerable value-enhancing potentials.

The Routledge Handbook of Environmental Economics in Asia IGI Global

TOGAF® Business Architecture Level 1 Study Guide Business Analysis & Valuation Using Financial Statements Business Analysis and Valuation: Using Financial Statements

Our newly digital world is generating an almost unimaginable amount of data about all of us. Such a vast amount of data is useless without plans and strategies that are designed to cope with its size and complexity, and which enable organisations to leverage the information to create value. This book is a refreshingly practical, yet theoretically sound roadmap to leveraging big data and analytics. Creating Value with Big Data Analytics provides a nuanced view of big data development, arguing that big data in itself is not a revolution but an evolution of the increasing availability of data that has been observed in recent times. Building on the authors' extensive academic and practical knowledge, this book aims to provide managers and analysts with strategic directions and practical analytical solutions on how to create value from existing and new big data. By tying data and analytics to specific goals and processes for implementation, this is a much-needed book that will be essential reading for students and specialists of data analytics, marketing research, and customer relationship management.

Models, Strategies, Tools BPP Learning Media

Strategic Business Analysis shows students how to carry out a strategic analysis of a business, with clear guidelines on where and how to apply the core strategic techniques and models that are the integral tools of strategic management. The authors identify the key questions in strategic analysis and provide an understandable framework for answering these questions. Several case studies are used to focus understanding and enable a more thorough analysis of the concepts and issues, especially useful for students involved with case study analysis. Accompanying the text is a CD-Rom containing the models, tutorial guidance, and a PowerPoint presentation. A blank template is provided for each model, enabling students to actively interact and enter their own data - an effective 'what if...' facility. This will enable students to appreciate the limitations as well as the advantages of the strategic models.

with Applications to Human Resource Management IGI Global Business Analysis and Valuation has been developed specifically for students undertaking accounting Valuation subjects. With a significant number of case studies exploring various issues in this field, including a running chapter example, it offers a practical and in-depth approach. This second edition of the Palepu text has been revitalised with all new Australian content in parts 1-3, making this edition predominantly local, while still retaining a selection of the much admired and rigorous Harvard case studies in part 4. Retaining the same author team, this new edition presents the field of valuation accounting in the Australian context in a clear, logical and thorough manner.

Formation and Early Growth of Business Webs Springer Science & Business Media

This book constitutes the refereed proceedings of the 40th International Conference on Conceptual Modeling, ER 2021, which will be held as virtual event, in October 2021. The 14 full and 18 short papers were carefully reviewed and selected from 85 submissions. The conference presents topics on conceptual modeling, its foundations and applications. Celebrating its 40th anniversary this year, the overall theme of ER 2021 is: Conceptual Modeling in an Age of Uncertainty.

Business Valuation Discounts and Premiums Emerald Group Publishing

Due to the global health crisis, economies had to adapt to combat pandemic situations. In the present pandemic crisis, new legislation, methods, labor approaches, values, and social behaviors have emerged with a huge impact in all organizations. However, countries have applied different solutions, procedures, and rules to deal with crises. Therefore, the impact has been different per country. Organizations need to understand their customers and businesses not only to increase operational efficiency but also to increase stakeholder's satisfaction and their competitiveness in a sustainable way. Customers are becoming more exigent and markets more complex, calling for the need for higher differentiation. This was enhanced in this pandemic situation, and to survive, organizations needed to change and adapt to the new normal. The Handbook of Research on Reinventing Economies and Organizations Following a Global Health Crisis deals with management and economic issues, particularly with the reinvention of businesses and economies due to the pandemic situation and the relevance of entrepreneurship, innovation, and intensive knowledge used to deal with these changes. This book emphasizes the challenges, difficulties, and opportunities for the success of businesses and economies in periods of crisis and provides information for dealing with entrepreneurship and innovation, networks, and complementarities to recover businesses. The chapters also point out possible opportunities, challenges, and risks in the process of recovery highlighting innovation, internationalization, technology, and intensive knowledge in promoting economies and companies' competitiveness. This book is ideal for entrepreneurs, managers, economists, directors, shareholders, researchers, academicians, and students interested in how businesses reinvent and recover following a global health crisis.

Public Value Management, Measurement and Reporting Van Haren

Shift your business model and transform your organization in the face of disruption *Business Model Shifts* is co-authored by Patrick van Der Pijl, producer of the global bestseller *Business Model Generation*, and offers a groundbreaking look at the challenging times in which we live, and the real-world solutions needed to conquer the obstacles organizations must now face. *Business Model Shifts* is a visually stunning guide that examines six

fundamental disruptions happening now and spotlights the opportunities that they present: The Services Shift: the move from products to services The Stakeholder Shift: the move from an exclusive shareholder orientation to creating value for all stakeholders, including employees and society The Digital Shift: the move from traditional business operations to 24/7 connection to customers and their needs The Platform Shift: the move from trying to serve everyone, to connecting people who can exchange value on a proprietary platform The Exponential Shift: the move from seeking incremental growth to an exponential mindset that seeks 10x growth The Circular Shift: the move from take-make-dispose towards restorative, regenerative, and circular value creation Filled with case studies, stories, and in-depth analysis based on the work of hundreds of the world's largest and most intriguing organizations, *Business Model Shifts* details how these organizations created their own business model shifts in order to create more customer value, and ultimately, a stronger, more competitive business. Whether you're looking for ways to redesign your business due to the latest needs of the marketplace, launching a new product or service, or simply creating more lasting value for your customers, *Business Model Shifts* is the essential book that will change the way you think about your business and its future.

The Magazine of Wall Street and Business Analyst Springer

One of the keys to successful business process engineering is tight alignment of processes with organisational goals and values. Historically, however, it has always been difficult to relate different levels of organizational processes to the strategic and operational objectives of a complex organization with many interrelated and interdependent processes and goals. This lack of integration is especially well recognized within the Human Resource Management (HRM) discipline, where there is a clearly defined need for greater alignment of HRM processes with the overall organizational objectives. *Value-Focused Business Process Engineering* is a monograph that combines and extends the best on offer in Information Systems and Operations Research/Decision Sciences modelling paradigms to facilitate gains in both business efficiency and business effectiveness.

Business Model Shifts Springer Science & Business Media

From the "guru to Wall Street's gurus" comes the fundamental techniques of value investing and their applications Bruce Greenwald is one of the leading authorities on value investing. Some of the savviest people on Wall Street have taken his Columbia Business School executive education course on the subject. Now this dynamic and popular teacher, with some colleagues, reveals the fundamental principles of value investing, the one investment technique that has proven itself consistently over time. After covering general techniques of value investing, the book proceeds to illustrate their applications through profiles

of Warren Buffett, Michael Price, Mario Gabellio, and other successful value investors. A number of case studies highlight the techniques in practice. Bruce C. N. Greenwald (New York, NY) is the Robert Heilbrunn Professor of Finance and Asset Management at Columbia University. Judd Kahn, PhD (New York, NY), is a member of Morningside Value Investors. Paul D. Sonkin (New York, NY) is the investment manager of the Hummingbird Value Fund. Michael van Biema (New York, NY) is an Assistant Professor at the Graduate School of Business, Columbia University. *Handbook of Research on Reinventing Economies and Organizations Following a Global Health Crisis* Univerlag tuberlin Business Analysis & Valuation Using Financial Statements Business Analysis and Valuation: Using Financial Statements Cengage AU *Handbook of Financial Planning and Control* John Wiley & Sons Addresses significant developments in the valuation of early stage enterprises at fair value with emphasis on practical applications—features a broad selection of case studies of early stage valuation *Early Stage Valuation: A Fair Value Perspective* provides a comprehensive review of the current methodologies used to value Early Stage Enterprises (ESEs) at fair value for financial reporting, investment, and mergers and acquisitions. Author Antonella Puca, Senior Director with Alvarez & Marsal Valuation Services in New York, provides accurate, up-to-date information on recent guidelines and new approaches for valuation assessments. This authoritative guide examines how to apply market analysis, discounted cash flows models, statistical techniques such as option pricing models (OPM) and Monte Carlo simulation, the venture capital method and non-GAAP metrics to ESE valuation. The text considers the most recent AICPA, Appraisal Foundation and IPEV guidance, and examines developments in both academic research and venture capital investor practice. Numerous real-world case studies illustrate early stage valuation suitable for structuring sound, internally consistent business transactions. Covering current trends and the latest regulatory guidance in the area, this book: Provides step-by-step guidance on practical valuation applications Reflects current standards for ESE valuation, including the AICPA Guide to the Valuation of Portfolio Company Investments, the IPEV guidelines and guidance from the Appraisal Foundation Covers new approaches to the valuation of ESEs with option pricing models, Monte Carlo Simulation, calibration and non-GAAP metrics Offers an overview of start-up valuation Discusses how intangible assets are impacting the valuation of ESEs The book also includes contributions from Neil Beaton, Andreas Dal Santo, Alexander Davie, John Jackman and Mark Zyla. *Early Stage Valuation: A Fair Value Perspective* is an essential resource for valuation specialists, private equity and venture capital fund managers, analysts, attorneys, investment bankers, regulators and auditors, and investors with interest in the private equity and venture capital industry.
