This new book focuses on the that latest research gains in the field of educational technology which is a creative blending of 'idea' and 'product' technologies with subject-matter content in order to engender and improve teaching and learning processes. Educational technology is often associated with the terms instructional technology or learning technology. 'Product' technologies are tangible; for example, computer hardware or software. 'Idea' technologies are cognitive frameworks or schemes; for example, the Multiple Intelligence Theory proposed by Howard Gardner. When products are thoughtfully blended with subject matter content (such as mathematics or science concepts) for a specific audience in a specific educational context (such as a

school), one is using 'educational technology'. The words educational and technology in the term educational technology have the general meaning. Educational technology is not restricted to the education of children, nor to the use of high technology.

Here is a book about adventure, raw experience, and facing inner demons. Niles Elliot Goldstein is a young rabbi who sets out to find God in tough and often scary situations: dogsledding above the Arctic Circle, taking the Silk Road into Central Asia without a visa, being chased by a grizzly bear, cruising with DEA agents through the South

Bronx, and spending a night in jail in New York City's Tombs. He explores the connections between struggle and growth, fear and transcendence, and uncertainty and faith, seeking the boundary where the finite meets the Infinite. Goldstein is not alone in making this kind of pilgrimage. There has always been a strong tradition of seekers who looked for revelation outside conventional religious settings and encountered God in moments of anguish, terror, and pain. Goldstein juxtaposes his own experiences with those of some of the great historical figures of Judaism and Christianity—Jonah and St. John of the Cross, Moses Maimonides and Julian of Norwich, Nachman of Bratslav and Martin Luther—as well as lesser known

mystics and preachers, and he discovers, as they did, that it can sometimes take a journey to the edge to recognize God's presence in our lives.

This Eighth Edition of Social Statistics for a Diverse Society continues to emphasize intuition and common sense, while demonstrating that social science is a constant interplay between methods of inquiry and important social issues. Recognizing that today's students live in a world of growing diversity and richness of social differences, authors Chava Frankfort-Nachmias and Anna Leon-Guerrero use research examples that show how statistics is a tool for understanding the ways in which race, class, gender, and other categories of

experience shape our social world and influence social behavior. In addition, guides for reading and interpreting the research literature help students acquire statistical literacy, while SPSS demonstrations and a rich variety of exercises help them hone their problem-solving skills.

Tourism has an essential role in terms of contributing to the financial sustainability of protected areas. In addition, through effective and efficient benefit-sharing, tourism can positively impact numerous stakeholders within and beyond the protected area. *Living on the Edge: Benefit-Sharing from Protected Area Tourism* highlights the complexity of benefit-sharing, the importance of identifying all relevant stakeholders, the challenges of ensuring equity and sustainability, and the critical importance of good governance. The

evolution of benefit-sharing mechanisms over time also emphasizes a continuing need to evolve and adapt to each unique situation as much evidence indicates that little has changed for those living on the edge. Although this book focuses on benefit-sharing from protected area tourism, it is essential to acknowledge that along with these benefits are costs associated with tourism, including possible increased local prices, loss of access to land, human-wildlife conflict, and other related costs. The contributing authors agree that benefit-sharing must include good governance, accountability, equity, transparency, a broad reach of stakeholder engagement, and a robust combination of tangible and intangible benefits - with recognition that benefit-sharing systems need to be adaptive

and evolve, as needed, according to the relevant situation. The chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism.
