Grammar Form and Function Cambridge University Press

Is the passive a unified universal phenomenon? The claim derived from this volume is that the passive, if not universal, has become unified according to function. Language as a means of communication needs the passive, or passive-like constructions, and sooner or later develops them based on other voices (impersonal active, middle, reflexive), specific semantic meanings such as adversativity, or tense-aspect categories (stative, perfect, preterit). Certain contributors review the passives in various languages and language groups, including languages rarely discussed. Another group of contributors takes a novel theoretical approach toward passivization within a broad typological perspective. Among the languages discussed are Vedic, Irish, Mandarin Chinese, Thai, Lithuanian, Mordvin, and Nganasan, next to almost all European languages. Various theoretical frameworks such as Optimality Theory, modern structuralist approaches, Role and Reference Grammar, cognitive semantics, Distributed Morphology, and case grammar have been applied by the different authors.

Form-Function Mapping in Content-Based Language Teaching McGraw-Hill

The study of language in written texts and transcripts of speech is greatly helped by a student's ability to identify and describe those prominent features of the grammar which make one variety of English different from another. *A Course Book in English Grammar* looks at many of the problems encountered by students and encourages them to find their own answers and to assess hypotheses about grammatical description. There are activities at each step, using authentic written and spoken data. Using 'real' texts avoids the faking of evidence to be found in some traditional grammar books, and interesting problems of analysis that arise in such texts are a source of useful discussion. The book has been thoroughly revised and expanded for this second edition, which contains additional chapters and material. A new opening chapter discusses the concept of 'grammatically correct

English' and the differences between descriptive, prescriptive and proscriptive approaches to the writing of grammar books. The book is a systematic description of Standard English, and examples of contemporary spoken dialectal grammar are introduced and analysed to illustrate the differences between standard and nonstandard usage. A Course Book in English Grammar will prove invaluable to all students of English Language.

**A Function-Based Introduction** Stanford Univ Center for the Study

The present volume examines the relationship between second language practice and what is known about the process of second language acquisition, summarising the current state of second language acquisition theory, drawing general conclusions about its application to methods and materials and describing what characteristics effective materials should have. The author concludes that a solution to language teaching lies not so much in expensive equipment, exotic new methods, or sophisticated language analysis, but rather in the full utilisation of the most important resources - native speakers of the language - in real communication.

*Modern English Structures* is a clear and accessible text that follows a structural approach to teaching basic English grammar. The book is divided into three parts: what a sentence constituent is, what a sentence constituent does, and where a sentence constituent goes—Form, Function, and Position. The objective of the book is to bring students to a better understanding of sentence

constituents and sentence structures, providing them with appropriate terminology to discuss these forms and relationships. This second edition has been revised and updated throughout. The accompanying *Modern English Structures Workbook* parallels the text and provides useful training both in memorization and in higher-order thinking skills.

*Grammar Form and Function 1, Teacher's Manual* Cambridge University Press

The importance of reflexive markers in the study of language structure cannot be underestimated: they participate in the coding of the argument structure of a clause; in the coding of semantic relations between arguments and verbs; in the coding of the relationship between arguments; in the coding of aspect; in the coding of point of view; and in the Coding of the information structure of a clause. The present volume offers an approach to reflexive forms and functions from several perspectives: a formal approach where reflexives are discussed within a well-defined model of language representation; a typological approach; a historical approach concentrating on grammaticalization of reflexives and on the changes that pronouns and anaphors undergo; and a functionalist approach where functions of reflexive forms are described. The languages from which data were drawn represent a wide variety of language families and language types: English, Old English, Dutch, German, Tsakhur (Nakh-Dagestani), Spanish, French, Bantu and Chadic languages. The variety of languages discussed and the different approaches taken complement each other in that each contributes an important piece to the understanding of reflexives in a cross-linguistic perspective.

CO-PUBLISHED BY ROUTLEDGE AND THE NATIONAL COUNCIL OF TEACHERS OF ENGLISH *Grammar to Get Things Done* offers a fresh lens on grammar and grammar instruction, designed for middle and secondary pre-service and in-service English teachers. It shows how form, function, and use can help teachers move away from decontextualized grammar instruction (such as worksheets and exercises emphasizing rule-following and memorizing conventional definitions) and begin considering grammar in applied contexts of everyday use. Modules (organized by units) succinctly explain common grammatical concepts. These modules help English teachers gain confidence in their own understanding while positioning grammar instruction as an opportunity to discuss, analyze, and produce language for real purposes in the world. An important feature of the text is attention to both the history of and current attitudes about grammar through a sociocultural lens, with ideas for teachers to bring discussions of language-as-power into their own classrooms.
