Poor Economics Springer  
The winners of the Nobel  
Prize in Economics upend

the most common  
assumptions about how  
economics works in this  
gripping and disruptive  
portrait of how poor

people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In *Poor Economics*, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions based on years of field research from around the world. Called "marvelous, rewarding" by the Wall Street Journal, the book offers a radical rethinking of the economics of poverty and an intimate view of life on 99 cents a

day. *Poor Economics* shows that creating a world without poverty begins with understanding the daily decisions facing the poor.

*Explain Pain* PublicAffairs 'O Mother Lachumamma, your blouse is torn, Your hair is soiled, your sari in rags . . . Even in that condition what have you done? You planted saplings, walking backwards like a bull, In order to produce food from the mud.' Kancha Ilaiah Shepherd translates these words of the Telugu poet, singer, activist

Gaddar to emphasize the productivity of the ordinary people, the Dalit-Bahujans of India, who receive so little in return. Arguing forcefully against spiritual fascism, which refuses equality or freedom to the majority, he commends the buffalo as a productive animal that epitomizes the qualities of the Dalit-Bahujans. This book contains a selection from Ilaiah Shepherd's columns in *The Hindu*, *Deccan Herald*, *Deccan Chronicle*, *Hindustan Times* among others, and journals such

as Mainstream and Economic and Political Weekly. Of particular interest is the new Afterword that discusses his political and social programme for the Sudras of India, presenting his vision of a more just society.

Language and Decoloniality in Higher Education brings together a collection of diverse papers that address, from

various angles, the issue of decoloniality, language and transformation in higher education. It reflects the authors' cumulative years of experience as educators in higher education in different southern contexts. Distilled as case studies, the authors use a range of decolonial lenses to reflect on questions of knowledge, language and learning, and to build a reflexive praxis of decoloniality through multilingualism. Besides a number of decolonial perspectives which

readers will be familiar with, this volume also explores a conceptual framework, Linguistic Citizenship, developed over the past two decades by scholars in southern Africa. In this collection, Linguistic Citizenship is used as a lens to 'think beyond' the inherited colonial matrices of language which have shaped this region (and many other southern contexts) for centuries, and to 're-imagine' multilingualism - and semiotics, more broadly - as a transformative

resource in the broader project of social justice. Although each chapter has firm roots in the South African context, these studies have much to offer others in their 'quest for better worlds'. Of particular interest to global scholars are the authors' recounts of how they have grappled with leveraging the country's multilingual resources in the project of promoting academic access and success in the face of historical hierarchies of language and social power.

experiences.

### **Becoming a teacher**

Manchester University Press

This book is not merely a new edition, but a complete and significantly expanded rewrite. It comprises over 900 pages of expert and in-depth exposition of this complex subject that has become so important in the modern global economy. Already established over four previous editions as the pre-eminent work on the subject it is a 'must-own book' for all students and practitioners of tax,

whether from a legal, business or accounting perspective. Professor Lynette Olivier and Michael Honiball are without peer in their understanding and clarity in this highly specialised field. Five new chapters have been added on: Taxation of individuals; Taxation of Companies and Dividends; Taxation of Partnerships; Cross-border VAT; and Interpretation of Statutes. "This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and

exercises and critical thinking activities end each section"--BCcampus website.

This third edition, like the first and second, strikes a balance between the theory of the law of evidence and its practical application in a constitutional issues, the impact of these sections on the Anglo-South African law of evidence, and the extent to which

some of them may be subject to constitutional challenges. Stock is also taken of the provisions of the Electronic Communications and Transactions Act 25 of 2002 and the consequences of the repeal of s 66 of the Internal Security Act 74 of 1982.

### Wearing Different Hats

Routledge

The bestselling classic that redefined our view of the relationship between beauty and female identity. In today's world, women have more power,

legal recognition, and professional success than ever before. Alongside the evident progress of the women's movement, however, writer and journalist Naomi Wolf is troubled by a different kind of social control, which, she argues, may prove just as restrictive as the traditional image of homemaker and wife. It's the beauty myth, an obsession with physical perfection that traps the modern woman in an endless spiral of hope, self-consciousness, and self-hatred as she tries to

fulfill society's impossible definition of "the flawless beauty."

### **Introduction to Business Information Systems** Discovery Publishing House

When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. "You know something!" I would say if it could hear me. "Now tell it to us in language we can understand!" Since its publication in 2005, From Dissertation to Book has helped thousands of

young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing, this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of From

Dissertation to Book is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and

confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy, whether reading on a page or a screen. Germano also acknowledges that not all dissertations can or even should become books and explores other, often overlooked, options, such as turning them into

journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of academic writing, From Dissertation to Book reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add “author” to their curriculum vitae.

**Community engagement and lifelong learning**  
Springer Science & Business Media

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the ‘elephant in the room’. These authors note that ‘the capstone experience in any teacher education programme is the student teaching practicum...

[a]fter all, this is where the rubber hits the road’. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the ‘gap’ that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters.

Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open- and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions

to classic WIL, namely, where “safe spaces” or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target

audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

this book enables the perceptive reader to study a dramatic part of South Africa's history through the experiences of the main protagonist. Because of his legal background, Daniel is able to see how an initially fair legal system is corrupted in order to serve the increasingly desperate needs of the White minority. This is a mere backdrop, however, to a love story that grows closer to tragedy as time passes because the heroine is an alcoholic. The arrival of the

computer alters the career of the hero dramatically and sends him on some overseas adventures to learn more about the legal implications of the new machine. As a leader of a missionary team to Malawi, Daniel also gets to grips with people with a totally different background and a differing worldview. The book is sensitive to background and atmosphere, and the hero encapsulates some of this in a few poems that form part of the main text.

Jealousy, that green-eyed monster, also rears its head occasionally and further complicates relationships.

*Path Integrals From Pev To Tev: 50 Years After Feynman's Paper - Proceedings Of The Sixth International Conference Academic Conferences and publishing limited*

This book is essential for academics that enter the field of higher education and training, as it focuses on preparing teachers and trainers to respond appropriately to student success challenges.

Student success is a burning issue, both globally and locally. While student achievement is determined by a combination of factors, teachers and their teaching practices do matter. Higher education teachers are expected to fulfil different roles at different times, such as planning for curriculum implementation, mentorship and coaching, facilitating learning, resource development, and student assessment. Against this background the primary purpose of

Empowering novice academics for student success: Wearing different hats is building the capacity of novice teachers and trainers to play an influential role in increasing student success throughput.
