Thomas  
Sankara: A  
Revolutionary  
in Cold War  
Africa offers

the first  
complete  
biography in  
English of the  
dynamic  
revolutionary  
leader from

Burkina Faso, Thomas Sankara. Coming to power in 1983, Sankara set his sights on combating social injustice, poverty, and corruption in his country, fighting for women's rights, direct forms of democracy, economic sovereignty, and environmental justice. Drawing on government archival sources and over a hundred interviews with Sankara's family

members, friends, and closest revolutionary colleagues, Brian J. Peterson details Sankara's political career and rise to power, as well as his assassination at age 37 in 1987, in a plot led by his close friend Blaise Compaoré. Thomas Sankara: A Revolutionary in Cold War Africa offers a unique, critical appraisal of Sankara and explores why he generated such enthusiasm

and hope in Burkina Faso and beyond, why he was such a polarizing figure, how his rivals seized power from him, and why T-shirts sporting his image still appear on the streets today. INTERNATIONAL BESTSELLER What does everyone in the modern world need to know? Renowned psychologist Jordan B. Peterson's answer to this most difficult of questions uniquely combines the hard-won truths of ancient tradition with the stunning revelations of cutting-edge scientific research. Humorous, surprising and informative, Dr. Peterson tells us why skateboarding

boys and girls must be left alone, what terrible fate awaits those who criticize too easily, and why you should always pet a cat when you meet one on the street. What does the nervous system of the lowly lobster have to tell us about standing up straight (with our shoulders back) and about success in life? Why did ancient Egyptians worship the capacity to pay careful attention as the highest of

gods? What dreadful paths do people tread when they become resentful, arrogant and vengeful? Dr. Peterson journeys broadly, discussing discipline, freedom, adventure and responsibility, distilling the world's wisdom into 12 practical and profound rules for life. 12 Rules for Life shatters the modern commonplaces of science, faith and human nature, while transforming and ennobling

the mind and spirit of its readers.

You'll learn: • Which aperture gives you the greatest contrast and sharpness, and when to use it • Which apertures

guarantee the background remains an out-of-focus tone • Which one aperture—when combined with the right lens—creates an area of sharpness from three feet to infinity • How to creatively use shutter speed to either freeze an action or imply motion • Where to take a meter reading when shooting a sunset, snow, or a city at dusk With new information on white balance, flash, HDR, and more, this

updated classic will inspire you to stop guessing and take control of your settings for better photos anytime, anywhere, and with any camera. *Bryan Peterson's Understanding Composition Field Guide* Random House LLC Flash is a necessary and immensely creative tool that dramatically increases the opportunities of any amateur photographer. However, many

amateurs find flash intimidating, unsure of where to begin. Instead, they continue limiting themselves to shooting only available light. Understanding Flash Photography is a guide to off-camera flash, helping free photographers from “auto” to get the images they want when natural light isn’t enough. If you’ve been afraid to venture past natural light, here is the book that will

finally help you explore the exciting possibilities of artificial light. Author Bryan Peterson starts by breaking down how flash works, then dispels the widely held myth that automatic “TTL” flash exposure is easier, explaining how to quickly master manual flash exposure to control the quality, shape, and direction of light. For the hundreds of thousands who found *Understanding Exposure* an

exciting tool in moving past “auto” exposure in available light, *Understanding Flash Photography* is the essential companion to mastering the often challenging exposure puzzle.
