 For the first time ever, CFT Made Simple offers easy-to-apply tools to help clients develop

self-compassion, learn mindfulness skills, and balance difficult emotions for greater treatment outcomes. Created by world-renowned psychologist Paul Gilbert, compassion-focused therapy (CFT) is extremely effective in helping clients work through painful feelings of shame and self-criticism. However, the theoretical aspects of this therapy—such as evolutionary psychology, attachment theory, and affective neuroscience—can make CFT difficult to grasp. This book provides everything you need to start implementing CFT in practice, either as a primary therapy modality or as an adjunctive approach to other therapies, such

as acceptance and commitment therapy (ACT), cognitive behavioral therapy (CBT), and more. CFT has unique strengths, and is especially effective in helping clients work through troubling thoughts and behaviors, approach themselves and others with greater compassion and kindness, and feel safer and more confident in their ability to handle life's challenges and difficulties. This book articulates the theoretical basis of the therapy in simple, easy-to-follow language, and offers practical guidance and strategies on how to tailor your CFT approach to specific client populations. As a clinician interested in the benefits of CFT but

wary of the dense theoretical principles that lay behind it, you need a user-friendly guide that will let you hit the ground running. CFT Made Simple is that guide.

Help your clients gain

access to the transformative grace of God through Christ! All too often, psychology and spirituality are kept in separate boxes, lessening the power of each to work effective changes. Christ-Centered Therapy: Empowering the Self brings together Christian faith with the Internal Family System (IFS) model. This widely accepted paradigm facilitates psychological healing by showing how the self can become the change agent for the dysfunctional internal system. Christ-centered IFS (CCIFS) combines the power of internal system therapy with the healing power of God for lasting change. Therapists with Christian clients, faith-based clients, or clients

who need foundational grounding will benefit from the psychological and spiritual dimensions of Christ-Centered Therapy: Empowering the Self. This powerful therapeutic model posits a self surrounded by subpersonalities who carry anger, fear, distrust, and other negative responses. When the client's self takes the leadership role, the self becomes the channel for Christ's grace for all the subpersonalities. One by one they become empowered, center around self and God, and contribute their resources to the functioning of the whole personality. Christ-Centered Therapy: Empowering the Self provides exercises and visual

aids to help both client and counselor, including: four tools to teach the self to lead effectively worksheets to serve as a structural and visual guide to understanding, developing, and using each tool a "parts map" for client and counselor to use collaboratively cartoons, structural diagrams, and dialogues to illustrate new concepts and procedures Each chapter of Christ-Centered Therapy: Empowering the Self provides specific help for the counselor, including: case studies showing step-by-step clinical interventions a content summary a clinical outline listing the interventions in sequence an exercise to help counselors discover their own

inner and spiritual dynamics Christ-Centered Therapy: Empowering the Self brings together the diagnostic and restorative power of IFS with the transforming power of Christian spirituality. It is essential for Christian counselors and for non-Christian counselors who are seeking more effective ways to treat Christian clients.

This new book challenges the medical model of the psychotherapist as

healer who merely applies the proper nostrum to make the client well. Instead, the authors view the therapist as a coach, collaborator, and teacher who frees up the client's innate tendency to heal. This book offers provocative reading for clinicians intrigued by the process of therapy and the process of change.

Becoming Myself

The Use of Self in Therapy discusses issues of transparency and self-disclosure; how can therapists use themselves effectively in their work without transgressing on professional regulations? The authors demonstrate how to train and develop the self and person of the therapist as a powerful adjunct to successful therapy, and examine the impact of the internet and social media on the conduct of therapy.

Doing Couple Therapy, First Edition

Fascinating patient stories and dynamic exercises help you connect to healing

emotions, ease anxiety and depression, and discover your authentic self. Sara suffered a debilitating fear of asserting herself.

Spencer experienced crippling social anxiety. Bonnie was shut down, disconnected from her feelings. These patients all came to psychotherapist Hilary Jacobs Hendel seeking treatment for depression, but in fact none of them were chemically depressed. Rather, Jacobs Hendel found that they'd all experienced traumas in their youth that caused them to put up emotional defenses that masqueraded as symptoms of depression. Jacobs Hendel led these patients and others toward lives newly capable of joy and fulfillment through an

empathic and effective therapeutic approach that draws on the latest science about the healing power of our emotions. Whereas conventional therapy encourages patients to talk through past events that may trigger anxiety and depression, accelerated experiential dynamic psychotherapy (AEDP), the method practiced by Jacobs Hendel and pioneered by Diana Fosha, PhD, teaches us to identify the defenses and inhibitory emotions (shame, guilt, and anxiety) that block core emotions (anger, sadness, fear, disgust, joy, excitement, and sexual excitement). Fully experiencing core emotions allows us to enter an openhearted state where we are calm, curious,

connected, compassionate, confident, courageous, and clear. In *It's Not Always Depression*, Jacobs Hendel shares a unique and pragmatic tool called the Change Triangle—a guide to carry you from a place of disconnection back to your true self. In these pages, she teaches lay readers and helping professionals alike • why all emotions—even the most painful—have value. • how to identify emotions and the defenses we put up against them. • how to get to the root of anxiety—the most common mental illness of our time. • how to have compassion for the child you were and the adult you are. Jacobs Hendel provides navigational tools,

body and thought exercises, candid personal anecdotes, and profound insights gleaned from her patients' remarkable breakthroughs. She shows us how to work the Change Triangle in our everyday lives and chart a deeply personal, powerful, and hopeful course to psychological well-being and emotional engagement.

Malcolm Fraser knew from personal experience what the person who stutters is up against. His introduction to stuttering corrective procedures first came at the age of fifteen under the direction of Frederick Martin, M.D., who at that time was Superintendent of Speech Correction for the New York City schools. A few years later, he worked with J. Stanley Smith, L.L.D., a stutterer and philanthropist, who, for altruistic reasons, founded the Kingsley Clubs in Philadelphia and New York that were named after the English author, Charles Kingsley, who also stuttered. The Kingsley Clubs were small groups of adult stutterers who met one

night a week to try out treatment ideas then in effect. In fact, they were actually practicing group therapy as they talked about their experiences and exchanged ideas. This exchange gave each of the members a better understanding of the problem. The founder often led the discussions at both clubs. In 1928 Malcolm Fraser joined his older brother Carlyle who founded the NAPA-Genuine Parts Company that year in Atlanta, Georgia. He became an important leader in the company and was particularly outstanding in training others for leadership roles. In 1947, with a successful career under way, he founded the Stuttering Foundation of America.

In subsequent years, he added generously to the endowment so that at the present time, endowment income covers over fifty percent of the operating budget. In 1984, Malcolm Fraser received the fourth annual National Council on Communicative Disorders' Distinguished Service Award. The NCCD, a council of 32 national organizations, recognized the Foundation's efforts in "adding to stutterers', parents', clinicians', and the public's awareness and ability to deal constructively with stuttering." Anger can arise in various ways in Internal Family Systems Therapy (IFS), depending on which part holds the anger, what function the anger serves, and whether the anger is disowned. Each situation requires a different type of therapeutic intervention as part of the IFS process. This professional booklet discusses these various circumstances and the approach that is most

effective in each. It includes a transcript of an IFS session that illustrates some of these points.

Taking an interdisciplinary approach, Robert Gray offers a thorough and well-rounded clinical guide to exploring the depth of the unconscious through art in psychotherapy. He emphasises the clinical relevance of art therapy and critically highlights ideas around evidence-based practice and the link to cognitive behavioural therapy. Gray suggests specific ways of engaging with clients and their images, such as uncovering life scripts, changing neural pathways through Creative Mind Ordering, and

addressing traumatic experiences through the Jungian Self-Box. He shows how artists and psychotherapists can make a transformational difference by combining 'art as therapy' and 'art in therapy' with a scientific approach and a spiritual awareness. He argues a clear framework that bridges the unmeasurable and spontaneous part of psychotherapy through art, along with the work with the unconscious and the clarity of a scientific method, can help facilitate long term change. Art Therapy and Psychology is hands-on and rich with supportive study tools and numerous case studies with which the reader can relate. This book is essential

reading for art therapists in training and in practice, psychologists and mental health professionals looking to establish or grow their expertise.

Internal Family Systems Therapy
 Guilford Publications
 Internal family systems therapy, or IFS, is one of the fastest growing models of psychotherapy today. Focused on psychic multiplicity and the healing effects of compassion, this non-pathologizing therapy has been adopted by clinicians around the world. Internal Family Systems Therapy builds on Richard Schwartz's foundational introductory texts, illustrating how the IFS protocol can be applied to a variety of therapy

modalities and patient populations. Each chapter provides clear, practical guidance and clinical illustrations. While addressing questions from therapists who are exploring the model or wonder about its applicability, Internal Family Systems Therapy is also essential reading for knowledgeable IFS clinicians.

Christ-centered Therapy New Harbinger Publications Originally developed for the treatment of borderline personality disorder, dialectical behavior therapy, or DBT, has rapidly become one of the most popular and most effective treatments for all mental health conditions rooted in out-of-control emotions. However,

there are limited resources for psychologists seeking to use DBT skills with individual clients. In the tradition of ACT Made Simple, DBT Made Simple provides clinicians with everything they need to know to start using DBT in the therapy room. The first part of this book briefly covers the theory and research behind DBT and explains how DBT differs from traditional cognitive behavioral therapy approaches. The second part focuses on strategies professionals can use in individual client sessions, while the third section teaches the four skills modules that form the backbone of DBT: core mindfulness, distress tolerance, emotion regulation, and

interpersonal effectiveness. The book includes handouts, case examples, and example therapist-

client dialogue—everything clinicians need to equip their clients with these effective and life-changing skills.
