Case Studies for Teaching Social Psychology Springer Publishing Company

English for Paramedics is a reading book for doctors and medical students whose mother language is other than English and who need to perfect their language skills and professional knowledge at the same time. In the first volume the cases concern the following topics: airway and breathing assessment; proper interventions for patients with respiratory compromise; oxygen delivery systems; ventilatory support; respiratory anatomy and physiology; basic airway management; basic cardiopulmonary resuscitation; advanced interventions, cardiology, Other casuistics describe medical emergencies (respiratory neurology; endocrinology; allergies/anaphylaxis; gastroenterology; urology; environmental; behavioural; toxicology). Further chapters are devoted to trauma, assessment recognition and treatment of various traumatic injuries still others to gynaecology, obstetrics and paediatrics. The last part of the first volume deals with operations, scene safety; legal considerations; vehicle operations; communications; documentation; infection controlling; quality improvement; DNR; basic patient assessment; basic physiology; hazardous materials; mass casualty incidents; and scene management. The second volume is divided into 24 units each of which contains about 20 casuistics. These covers the whole area of emergency services but are not grouped according to their subjects which enables to revise the information in a new and discovering manner. Case studies were taken over from materials for self study and testing professional knowledge of future paramedics (see Bibliography). The reading book is suitable for intermediate students but vocabularies at the end of each unit are so detailed than also beginners can use the book and continue in his or her own pace. All texts are short, written in actual language and always contain the right answer (marked with *). The method of filling in the right answers is not only popular with students but also very efficient in learning new words in context of well known facts. The teachers can find inspiration for further use of casuistics in dialogues and model situations. Some English teachers may find the idea of translating the vocabularies into their own languages interesting which would be a great satisfaction for the author. This reading book will be followed soon by English for Paramedics Textbook and Exercise book. The author wishes the students a lot of pleasure and success in learning professional medical English. Awarded first place in the 2017 AJN Book of the Year Awards in the Medical-Surgical Nursing category. Learn how to become an exceptional caregiver in today's evolving healthcare environment! Written by a dedicated team of expert authors led by Sharon Lewis, Medical-Surgical Nursing, 10th Edition offers up-to-date coverage of the latest trends, hot topics, and clinical developments in the field. Completely revised and updated content explores patient care in various clinical settings and focuses on key topics such as patient safety, NCLEX exam preparation, evidence-based practice, and teamwork. A variety of helpful boxes and tables make it easy for you to find essential information and the accessible writing style and building-block approach make even the most complex concepts easy to grasp. Best of all — a complete collection of learning and study resources helps you learn more effectively and offers valuable, real-world preparation for clinical practice. Highly readable format offers you a strong foundation in medical-surgical nursing. Content written and reviewed by leading experts in the field ensures that information is comprehensive, current, and clinically accurate. Informatics boxes discuss how technology is used by nurses and patients in healthcare settings. Expanded coverage of evidence-based practice helps you understand how to apply the latest research to real-life patient care. Expanded Safety Alerts throughout the book highlight patient safety issues and focus on the latest National Patient Safety Goals. UNIQUE! "Levels of Care" approach explains how nursing care varies for different levels of health and illness. Bridge to NCLEX Examination review questions at the end of each chapter reinforce key content while helping you prepare for the NCLEX examination with both standard and alternate item format questions. Unfolding case studies included throughout each assessment chapter help you apply concepts and procedures to real-life patient care. Managing Care of Multiple Patients case studies at the end of each section help you apply your knowledge of various disorders and prioritize and delegate patient care. Separate chapter on genetics focuses on the practical application to nursing care of patients. Genetics in Clinical Practice boxes address key topics such as genetic testing, Alzheimer's disease, sickle cell disease, and genetics-related ethical issues. Genetic Risk Alerts and Genetic Link headings highlight specific genetic issues related to body system assessments and disorders.

AACN Core Curriculum for Pediatric High Acuity, Progressive, and Critical Care Nursing, Third Edition Jones & Bartlett Publishers

The case study has proved of enduring interest to all Western societies, particularly in relation to questions of subjectivity and the sexed self. This volume interrogates how case studies have been used by doctors, lawyers, psychoanalysts, and writers to communicate their findings both within the

specialist circles of their academic disciplines, and beyond, to wider publics. At the same time, it questions how case studies have been taken up by a range of audiences to refute and dispute academic knowledge. As such, this book engages with case studies as sites of interdisciplinary negotiation, transnational exchange and influence, exploring the effects of forces such as war, migration, and internationalization. Case Studies and the Dissemination of Knowledge challenges the limits of disciplinary-based research in the humanities. The cases examined serve as a means of passage between disciplines, genres, and publics, from law to psychoanalysis, and from auto/biography to modernist fiction. Its chapters scrutinize the case study in order to sharpen understanding of the genre's dynamic role in the construction and dissemination of knowledge within and across disciplinary, temporal, and national boundaries. In doing so, they position the case at the center of cultural and social understandings of the emergence of modern subjectivities.

Classic Case Studies in Psychology W B Saunders Company

Case Studies in Infectious Disease: Streptococcus pyogenes presents the natural history of this infection from point of entry of the pathogen through pathogenesis, clinical presentation, diagnosis, and treatment. A set of core questions explores the nature, causation, host response, manifestations, and management of this infectious process. This case also includes summary bullet points, questions and answers, and references.

Case Studies in Nurse Anesthesia Xlibris Corporation

Now edited by a pulmonologist, the 3rd edition is still one of the most well-written texts for students learning to understand the assessment and treatment of patients with respiratory disease. Each chapter begins with a background of selected disorders, followed by a case study with questions and answers designed to stimulate critical thinking skills.

Social Work in Extremis Jones & Bartlett Learning

This new edition of Classic Case Studies is the essential selection of case studies and stories that illustrate not only many of the most fundamental tenets of psychology, but also some of the most extreme forms of human behavior. The human mind is both extraordinary and compelling. From the leader who convinced his followers to kill themselves to the man who lost his memory, these famous accounts have provided invaluable insights for scholars and researchers and amazed the public at large. Brought to life by Rolls, each case is contextualized with more typical behaviour, while the latest thinking in each subfield is also discussed. Revised and updated, the new edition features two new case studies, including the 'Jim Twins' by Thomas Bouchard, an amazing case of twins separated at birth and adopted by different parents, yet when reunited 30 years later shared so many behavioural characteristics. Also featuring a new chapter on approaches, issues and debates, accessibly written and requiring no prior knowledge of psychology, this book is essential reading for A-Level students and undergraduates alike. Geoff Rolls has taught psychology for over 26 years and is currently Head of Psychology at Peter Symonds College, Winchester. He is the author of the popular Women Can't Park, Men Can't Pack (Chambers, 2009), which investigates gender stereotypes (including driving), and also Taking the Proverbial (Chambers, 2007), which explores the psychological truth behind well-known proverbs and sayings. .

A Guide for Application and Review Oxford University Press

Perfect for: • Bachelor of Nursing Students • Diploma of Nursing Students Apply theory to practice with the Clinical Cases textbook series! Get to know the fundamentals of nursing with this nursing textbook, which offers nursing students insightful case studies based on real-life situations that you are likely to encounter in a practical environment. Benefit from Scully and Wilson's Clinical Cases: Fundamentals of Nursing Case Studies nursing textbook, which has been written to assist with exam preparation and revision thanks to its collection of multiple choice questions and answers. Clinical Cases: Fundamentals of Nursing Case Studies is clearly structured to maximise your learning. Each case study begins with an introduction of the presenting condition and its symptoms. As the scenario develops, information concerning the patient's condition, tests and medications are provided. At the close of each case study, the patient outcomes are explored in addition to a discussion of the most significant considerations of the scenario. It is strongly recommended that nursing students enrolled in the Diploma and Bachelor Nursing courses use Fundamentals of Nursing Case Studies alongside Potter and Perry's Fundamentals of Nursing, 4th Edition by Jackie Crisp, Catherine Taylor and Geraldine Rebeiro. This enables you to maximise your learning and develop a very strong understanding of core nursing concepts. Other titles in this series: • Clinical Cases: Medical-Surgical Nursing Case Studies by Janine Bothe. • Clinical Cases: Nursing Care Case Studies by Margaret Webb and Ellie Kirov. Other formats: This book is also available as an App via the Apple App Store <https://itunes.apple.com/au/app/clinical-cases-fundamentals/id620500072?mt=8> • Easy-to-understand, logical layout. • 24 case studies covering pertinent nursing topics, including Vital Signs, Skin Integrity, Medication Therapy and Pain Management. • Multiple choice questions to test your knowledge throughout the textbook. • Explanations provided for all answers. • References for further reading and research. • Designed as an exam preparation and revision tool.

Medical-Surgical Nursing - E-Book Jones & Bartlett Learning

Pediatric Education for Prehospital Professionals (PEPP), Fourth Edition is an evidence-based resource of essential medical content for the assessment and management of infants and children in the field. This respected and ground-breaking program paired physicians and EMS providers together to ensure the content reflects current best practices and the realities of the field. Developed by the American Academy of Pediatrics, PEPP is designed to give prehospital professionals the knowledge, skills, and confidence they need to effectively assess and manage pediatric patients. PEPP combines world-class content with engaging features and an interactive course to truly prepare prehospital professionals to care for pediatric patients. The Fourth Edition Includes: A new chapter on Behavioral Emergencies A top-flight EMS author team working with AAP physician reviewers to ensure exceptional medical content with a focus on how it is applied in the "streets" New procedures on tourniquet application and intranasal medication administration Features Include: The Pediatric Assessment Triangle (PAT) represents the essence of the PEPP patient assessment method, which includes assessing appearance, work of breathing, and circulation to the skin. The Patient Assessment Flowchart provides students with an easy-to-understand reference of the pediatric patient assessment process. Case Studies provide an opportunity for students to apply the foundational knowledge presented in the chapter and strengthen their critical-thinking skills. Procedures provide step-by-step explanations and visual summaries of vital BLS and ALS pediatric care skills. Flexible Course Options: PEPP Course Coordinators may offer a 2-day onsite course or a 1-day enhanced hybrid course at the BLS or ALS level. The onsite course features interactive case-based lectures where students apply their knowledge in a safe environment. The hybrid course features case-based online modules with engaging interactivities, including rapid skills demonstration videos that students complete before attending the onsite portion for hands-on skill station coaching and small-group discussions. The BLS-level courses are geared toward emergency responders and EMTs, while the ALS-level courses are geared toward AEMTs and Paramedics.

Pharmacology and the Nursing Process E-Book Jones & Bartlett Publishers

The perfect companion to Brunner & Sudarth's Textbook of Medical-Surgical Nursing, this exemplary study tool helps you better understand the concepts, disease processes, and nursing care detailed in the textbook. Designed to help you review and apply important concepts from the textbook to prepare for exams as well as for your nursing career, each fully revised chapter includes three sections: Assessing Your Understanding (including fill-in-the-blank, short answer, and matching questions), Applying Your Knowledge (comprised of case-based questions), and Practicing for NCLEX (containing both multiple-choice and alternate-format NCLEX-style questions). An Answer Key is included at the end of the book.

Advances, Challenges and the Way Ahead Jones & Bartlett Learning

This book presents a case history of a patient with toxic shock syndrome, to illustrate in a clinical context essential points about the mechanisms of immunity and to explain some of the immunological problems often seen in the clinic. It is helpful for medical students and pre-medical students.

Lewis's Medical-Surgical Nursing, Fourth South Asia Edition - E-Book Emerald Group Publishing

Children are not simply adults. They commonly present with unique problems that are typically not encountered in older patients. These unique problems require the paramedic to alter, to some degree, his or her approach to the sick or injured child. Because a relatively small percentage of EMS calls involve a critically ill or injured child, it is common for the paramedic to experience anxiety when such a call is received. Pediatric Case Studies for the Paramedic contains 20 case studies representing a variety of pediatric emergencies that paramedics may encounter in the field.

Trauma Case Studies for the Paramedic Garland Science

Medical Case Studies for the Paramedic contains 20 case studies representing a variety of medical emergencies that the paramedic may encounter in the field. Each case study begins by presenting dispatch information and a general impression of the patient upon arriving at the scene. Then, as the case progresses, pertinent patient information is provided, interspersed with a series of standardized questions designed to assess the paramedic's ability in correlating specific signs and symptoms with a particular medical condition and providing the appropriate treatment.

Case Studies Jones & Bartlett Learning

This research report presents a case study of the application of the proposed methodology to Sudan using data captured by the 2014-2015 National Household Budget and Poverty Survey (NHBS). The application of the methodology proposed in the toolkit requires the identification of individuals' characteristics to fit them into specific social groups, and the risks to which each of these categories is exposed. This survey enables the identification of different social groups according to the age, gender and place of residence of the respondents, as well as six risks: a child being out of school, food insecurity, unemployment, insufficient earnings, crop failure and livestock issues, and natural disaster. In conclusion, this study indicates a significant social protection coverage gap in Sudan. Government social protection programmes reach less than 3 per cent of women and men in rural and urban areas. Also government provision of formal social protection makes the smallest contribution to mitigating risks (0.4 per cent) as compared to other sources of protection. In other words, the benefits currently provided by the government are insufficient to address the risks that affect the population throughout the life cycle, hampering people's livelihoods and the country's development.
