As university student exchanges provide participants with increasing opportunities to involve themselves in different academic cultures, it has become crucial to gain a better understanding of cultural contact between academic systems and to recognise how exchange students with diverse academic

backgrounds interact in a host academic context. This book provides insights into this research area by undertaking a one-academic-year ethnographic examination of six Japanese exchange students' management of intercultural academic interaction at an Australian university, as well as analysing the impact of the structural arrangements of the student exchange program on their participation. In this book, the theory of language management is utilised alongside of the concept of legitimate peripheral participation and a socio-constructionist genre theory to investigate the cognitive and situated nature of the management processes. The theory of language-in-education planning is also applied to examine the policies and practices of student exchanges between Japanese home universities and an Australian host university. Focussing on Japanese exchange students' responses to various academic tasks as well as on their everyday participation in class, the present study mainly analyses the students' negotiation of norms, awareness and evaluations of contact situation phenomena, planning and implementation of management strategies, discontinuation of academic management, and the developmental processes of their academic participation. This study also investigates various types of tensions in structuring student exchanges among policies, practices, educational needs and goals of Japanese exchange students, their motivational investments, and accessibility of current exchange systems to the students. Based on the findings, this book provides important theoretical implications for sociolinguistic research and SLA studies by discussing the detailed mechanisms of academic management, and by reconsidering the importance of the integration of sociocultural perspectives into the cognitive processes of intercultural academic interaction. The theoretical inquiries which this study conducts will, furthermore, promote our understanding of linguistic minority exchange students' management of participation in various academic contexts and suggest the ways home and host universities support these exchange students' transition between the two different academic cultures.

This is the swashbuckling life story of one of Scotland's greatest sons. Ian Hamilton, born the son of a Paisley tailor in 1925, who made himself world-famous on Xmas Eve, 1950, when he helped to remove the Stone of Destiny from Westminster Abbey and

return it to its spiritual home of Scotland. This symbolic act was to set Hamilton along a lonely path as a solitary Scottish patriot whose actions have always stemmed from his deep love of his native land. He has never taken the easy option and his remarkable biography recounts episodes which encompass his many abilities and talents. Although renowned as a Queen's Counsel, he has also been a publisher, printer, award-winning playwright, oyster farmer, pilot, museum curator and transatlantic yachtsman (failed). He was also the first man to canoe across Scotland. His legal responsibilities took him to countries as diverse as Canada and Zambia, from both of which he was expelled. First published in 1990 but now with a final chapter written in May 2014 and a foreword by socialist agitator and independence campaigner Tommy Sheridan, Ian's story is extremely pertinent in the run up to the independence referendum. This popular biography is a cry for Scottish identity at a turning point in the nation's history.

Does university seem like another planet? Does everyone else seem to speak another language? What can you do to make the grade? If these are the kind of questions you are asking, then this is the book you need. After the excitement of being accepted, the reality of life at university or college can be daunting, but help is at hand. This practical book guides new students through the terminology used at university and shows you: what a student needs to know how to be accepted by students and lecturers how to get the best out of your institution and yourself how to communicate using appropriate language in higher education institutions how to learn the conventions of your specific subject area how to be confident and competent in your new world All new students find the move to university slightly bewildering, but with this book you can be one step ahead. The author has spent time talking to students across a broad range of different universities and uses her first-hand experience as a basis for the book. Understanding University provides a lifeline for new students in further and higher education offering everything from practical advice on studying, to explanations of frequently used terms. If you don't know the difference between a seminar and a tutorial or want to know what 'matriculation' means, then this is

where to start. Need a little assistance? Just open this book. And remember - you are not alone.

The converged management of academic libraries and computer services emerged as a popular model in universities in the late 1980s. Today over half of the higher education sector in the UK has adopted a converged structure and yet there has been little analysis of this radical approach and what it means for the services involved. This timely book takes stock of some twenty years of experience of convergence. It explores management practice throughout the sector in order to assess how extensive the converged model has become, and what variations in the model exist: the reasons for converging - or de-converging, or deciding not to converge at all; the perceived advantages and disadvantages of the model adopted; and what lessons have been learned. Readership: This book is essential reading for all managers in academic libraries and computer service departments, and for all university staff with responsibility for policy in this area.

Get practical solutions to the problems faced when implementing an electronic reserve service! Academic libraries that provide electronic reserve services offer convenient access to information to their students and faculty while gaining numerous other advantages, such as reducing both loss and staff workload. Marketing and Managing Electronic Reserves presents leading authorities with practical solutions to the challenges in effectively integrating electronic reserves services and marketing them to users. This book provides positive approaches that any academic library considering the implementation of an electronic reserve operation can use. All factors are considered, including size of institution, the relationship between the library and academic departments, and the budget and plan for marketing the service. More and more colleges and universities are implementing distance education programs, highlighting the increasing need for

remote access to information in the library, including reserve material. But executing monumental change is always difficult. *Marketing and Managing Electronic Reserves* tackles the difficult issues, discussing various libraries' journeys in bringing about the changes needed to remain the central information source for students and faculty. Problems inherent in the evolution from traditional reserve services to electronic reserves are examined, offering effective strategies for smooth transition. Whatever type of system you are considering, from homegrown to commercial to hybrid electronic reserves service, this book can help. *Marketing and Managing Electronic Reserves* explains how others tackled challenges, such as: implementing Endeavor's Voyager Integrated Library System and the software used for authenticating users handling copyright compliance integration of electronic reserves into course management systems moving from a paper-based to a Web-based course reserve system offering and marketing one-stop teaching support to faculty a large institution's shift to a collaborative approach with electronic reserves and course management software establishing a suite of electronic utilities that fulfills teaching and essential learning activities implementing the Blackboard Content System™ marketing for a smooth transition from traditional to electronic reserves marketing to the faculty process improvement technique applied to electronic reserves integration of electronic reserve with a Library Management System and Course Management System trends for the future *Marketing and Managing Electronic Reserves* is crucial reading for access services librarians, circulation and reserve librarians, public service librarians, library school faculty who teach public services courses, integrated library systems managers, and university course management software specialists.
