Dealing with all the aspects of diabetes in clinical practice, this book offers a

comprehensive, easy-to-use guide to help healthcare professionals achieve their target of optimal management and treatment of their patients. *Diabetes in Clinical Practice: Questions and Answers from Case Studies* is presented in the form of questions concerning diabetes diagnosis, management and therapy based on real-life case studies. Each question is answered in a clear, easy to follow style. The authors begin with general questions regarding diabetes, its pathophysiology and diagnostic tests. They then cover all the major complications that can arise in a patient with poorly controlled diabetes. The authors also discuss special groups, such as adolescents and the elderly. The book features useful information for patients and their healthcare professionals on

daily activities such as exercise, nutrition, driving, travelling and sick day rules. *Diabetes in Clinical Practice: Questions and Answers from Case Studies* is an indispensable resource for all members of the diabetes team, in primary and secondary care: physicians, diabetes specialist nurses, diabetes educators, dieticians, podiatrists, endocrinologists and postgraduate medical students.

This book is the perfect study guide to help readers pass one of the four core exams in the MCSE Windows Server 2003 certification program and an elective exam in the MCSA program. This exam measures the ability to install, manage, monitor, configure, and

troubleshoot DNS, DHCP, Remote Access, Network Protocols, IP Routing, and WINS in a Windows Server 2003 network infrastructure. In addition, it measures the skills required to manage, monitor, and troubleshoot Network Address Translation and Certificate Services. This book is not intended to teach new material. Instead it assumes that you have a solid foundation of knowledge but can use a refresher on important concepts as well as a guide to exam topics and objectives. This book focuses exactly on what you need to pass the exam - it features test-taking strategies, time-saving study tips, and a special Cram Sheet that includes tips, acronyms, and memory joggers not available anywhere else. The series is supported online at several Web sites:

examcram.com, informit.com, and cramsession.com. The accompanying CD features PrepLogic™ Practice Tests, Preview Edition. This product includes one complete PrepLogic Practice Test with approximately the same number of questions found on the actual vendor exam. Each question contains full, detailed explanations of the correct and incorrect answers. The engine offers two study modes, Practice Test and Flash Review, full exam customization, and a detailed

International Higher Education Civil Litigation introduces students to the processes and procedures involved in making and defending civil litigation claims. The text is ideal for students taking the Legal Practice Course or relevant LLB or LLM modules and features case studies on both a personal injury matter and a commercial matter, making it suitable for students with either a high street or a commercial focus. Following the chronological progression of a civil litigation claim, the

book offers practical guidance on advising clients whilst ensuring that the principles of the SRA Handbook and Code of Conduct 2011 are maintained. Students on CILEx courses, new trainees in practice, and paralegals will find this practical guidance of use in both their study and their work. Innovative diagrams at the beginning of chapters clearly illustrate the litigation procedure and help students understand the nature of the process as a whole. Examples provide students with a realistic context for their learning, while issues of cost, best practice, and professional conduct are clearly highlighted. Alternative dispute resolution is given appropriate practical emphasis, and references to the Civil Procedure Rules throughout make sure that students are ready for

This phenomenal new text focuses on assisting students in learning that there can be many possible choices in the clinical decision making process, and that these different choices can lead to many equally successful outcomes. *Case Studies Through the Health Care*

Continuum: A Workbook for the Occupational Therapy Student is an entire book of case studies of adults with physical and psychological deficits. Each case study is followed by questions, organized around performance areas and performance components, treatment planning and discharge planning areas. The questions are designed to encourage clinical thinking about the cases. The cases encompass a variety of diagnoses and take place in a variety of health care arenas. By using case studies, students will begin to, and advance, their thinking process before directly dealing with clients. The cases are comprehensive and well thought out, and the questions provide a good starting point for processing and guiding critical thinking. This exceptional text

can be used in almost every course in the curriculum!

Asking Good Questions moves beyond a traditional discussion of ethical theory, focusing on how educators can use these important frameworks to facilitate critical thinking about real-life ethical

dilemmas. In this way, authors Nancy Stanlick and Michael Strawser offer students a theoretical tool kit for creatively addressing issues that influence their own environments. This text begins with a discussion of key ethical theorists and then guides the reader through a series of original case studies and follow-up activities that facilitate critical thinking, emphasize asking thought provoking questions, and teach the student to address the complexity of ethical dilemmas while incorporating the viewpoints of their peers. Additionally, Stanlick and Strawser include an extensive preface, a mind-mapping technique for analyzing and formulating arguments, and a six step process for approaching complex real-life moral issues. Each chapter

incorporates suggested assignments, discussion questions, and references for further reading, and a guide for instructors offering a sample course schedule and suggestions on how to use this book effectively is also available. This text is designed to help educators engage students in a meaningful discussion of how historical theories apply to their own lives, providing rich and unique resources to learn about these critical issues.

A collection of case studies for prospective school administrators that emphasizes problem solving, decision-making, and effective management. Based on the conviction that effective

practice in school administration requires both leadership and management, this text provides a mix of problems that require administrative decisions as presented in 24 open-ended case studies. In today's reform-minded, information-based society, practitioners must be able to frame problems correctly and then make effective decisions to ameliorate them. As leaders, district and school-level administrators are expected to focus on what should be done to improve schools; as managers, they are expected to focus on how to do things successfully. The cases in this book are designed to make students think about common problems of practice by encouraging them to bridge theory and practice. Each case provides an active form of learning,

allowing students to demonstrate their ability to apply knowledge to common problem situations.

The influx of computer technology into classrooms during the past decade raises the questions -- how can we teach children to use computers productively and what effect will learning to program computers have on them? During this same period, researchers have investigated novice learning of computer programming. Teaching and Learning Computer Programming unites papers

and perspectives by respected researchers of teaching and learning computer science while it summarizes and integrates major theoretical and empirical contributions. It gives a current and concise account of how instructional techniques affect student learning and how learning of programming affects students' cognitive skills. This collection is an ideal supplementary text for students and a valuable reference for professionals and researchers of education, technology and psychology, computer science, communication, developmental psychology, and industrial organization.
