BASIC MARKETING RESEARCH, 9E balances a reader-friendly approach with an ideal level of coverage. The authors introduce two dominant approaches to gathering marketing information: marketing analytics on data that exist within the firm and customer insights gathered for a specific purpose. The book merges these approaches in an ongoing example in the analysis section. Readers review data from multiple sources, including consumer communication and consumer behavior observed through technology. An overview details how organizations obtain and use data today. Readers learn how interactions among parts of the research process give managers and researchers confidence in the results. Readers review the information-gathering function from the perspectives of researchers who gather information and marketing managers who use it. The Complete Idiot's Guide to Research Methods SAGE

Publications Interviews are a frequent and important part of empirical research in political science, but graduate programs rarely offer discipline-specific training in selecting interviewees, conducting interviews, and using the data thus collected. *Interview Research in Political Science* addresses this vital need, offering hard-won advice for both graduate students and faculty members. The contributors to this book have worked in a variety of field locations and settings and have interviewed a wide array of informants, from government officials to members of rebel movements and victims of wartime violence, from lobbyists and corporate executives to workers and trade unionists. The authors encourage scholars from all subfields of political science to use interviews in their research, and they provide a set of lessons and tools for doing so. The book addresses how to construct a sample of interviewees; how to collect and report interview data; and how

to address ethical considerations and the Institutional Review Board process. Other chapters discuss how to link interview-based evidence with causal claims; how to use proxy interviews or an interpreter to improve access; and how to structure interview questions. A useful appendix contains examples of consent documents, semistructured interview prompts, and interview protocols.

As the bestselling nursing research text, *Understanding Nursing Research: Building an Evidence-Based Practice*, 6th Edition offers unique insights into understanding, appraising, and applying published research to evidence-based practice. It is known for its authoritative content, time-tested systematic approach, and unique research example format newly redesigned for the sixth edition to better demonstrate how the steps of the research process relate to evidence-based nursing. "This would be excellent for student nurses, nurses new to research or any nurse with an interest in research." Reviewed by: Helen Reeves, St Giles Walsall Hospice on behalf of Nursing Times,

December 2015

Authoritative content is written by two of the true pioneers in nursing research, who offer unique, first-hand insights into the field. Research examples provide practice in working with published studies, with many of the examples including Critical Appraisal and Implications for Practice sections. Clear, step-by-step organization introduces the research process and demonstrates how this systematic framework relates to evidence-based practice. Strong emphasis on evidence-based practice helps you develop skills in studying and appraising published research, so you are prepared for your role in working with research evidence. Critical Appraisal Guidelines boxes provide step-by-step guidance in appraising published research studies. Emphasis on critical appraisal versus critique reflects contemporary usage in nursing research and evidence-based practice. Balanced coverage of qualitative research prepares you to approach research questions and clinical questions with an unbiased view of the researcher's

methodology. Presentation of two different appraisal processes covers both the traditional in-depth critical appraisal process that prepares you for graduate-level work in research, and the concise, practice-focused research appraisal process that equips you for quick and accurate evaluation of the applicability of research findings to clinical practice.

Quality accreditation in higher education institutions (HEIs) is currently a buzzword. The need to maintain high-quality education standards is a critical requirement for HEIs to remain competitive in the market and for government and regulatory bodies to ensure the quality standards of programs offered. From being an implicit requirement that is internally addressed, quality assurance activities become an explicit requirement that is regularly audited and appraised by national and international accreditation agencies. HEIs are voluntarily integrating quality management systems (QMS), institutional and program-

specific, in response to the political and competitive environment in which it exists. Through its higher education department or by creating non-profitable accreditation bodies, many governments have implemented a quality framework for licensing HEIs and invigilates its adherence based on which accreditation statuses are granted for HEIs. *Global Perspectives on Quality Assurance and Accreditation in Higher Education Institutions* provides a comprehensive framework for HEIs to address quality assurance and quality accreditation requirements and serves as a practical tool to develop and deploy well-defined quality management systems in higher education. The book focuses on the critical aspects of quality assurance; the need to develop a concise and agile vision, mission, values, and graduate attributes; and to develop a system that effectively aligns the various activities of the HEI to the attainment of the strategic priorities listed in the institutional plans. The chapters each cover the various facets of the quality assurance framework and

accreditation agencies' requirements with practical examples of each. This book is useful for HEI administrators, quality assurance specialists in HEIs, heads of academic departments, internal auditors, external auditors, and other practitioners of quality, along with stakeholders, researchers, academicians, and students interested in quality assurance and accreditation in higher education.
