NOBLE SELINA

A History of Johore, 1365-1941 Manchester University Press
Despite the existence of about a thousand ethnolinguistic groups in Southeast Asia, very few historians of the region have engaged the complex issue of ethnicity. *Leaves of the Same Tree* takes on this concept and illustrates how historians can use it both as an analytical tool and as a subject of analysis to add further depth to our understanding of Southeast Asian pasts. Following a synthesis of some of the major issues in the complex world of ethnic theory, the author identifies two general principles of particular value for this study: the ideas that ethnic identity is an ongoing process and that the boundaries of a group undergo continual—if at times imperceptible—change based on perceived advantage. The Straits of Melaka for much of the past two millennia offers an ideal testing ground to better understand the process of ethnic formation. The straits forms the primary waterway linking the major civilizations to the east and west of Southeast Asia, and the flow of international trade through it was the lifeblood of the region. Privileging ethnicity as an analytical tool, the author examines the ethnic groups along the straits to document the manner in which they responded to the vicissitudes of the international marketplace. Earliest and most important were the Malayu (Malays), whose dominance in turn contributed to the "ethnicization" of other groups in the straits. By deliberately politicizing differences within their own ethnic community, the Malayu encouraged the emergence of new ethnic categories, such as the Minangkabau, the Acehese, and, to a lesser extent, the Batak. The Orang Laut and the Orang Asli, on the other hand, retained their distinctive cultural markers because a separate yet complementary identity proved to be economically and socially advantageous for them. Ethnic communities are shown as fluid and changing, exhibiting a porosity and flexibility that suited the mandala communities of Southeast Asia. *Leaves of the Same Tree* demonstrates how problematizing ethnicity can offer a more nuanced view of ethnic relations in a region that boasts one of the greatest diversities of language and culture in the world. Creative and challenging, this book uncovers many new questions that should revitalize and reorient the historiography of Southeast Asia.

Finalist for the 2018 National Council on Crime & Delinquency's Media for a Just Society Awards Nominated for the 49th NAACP Image Award for Outstanding Literary Work (Nonfiction) A 2017 Washington Post Notable Book A Kirkus Best Book of 2017 "Butler has hit his stride. This is a meditation, a sonnet, a legal brief, a poetry slam and a dissertation that represents the full bloom of his early thesis: The justice system does not work for blacks, particularly black men." —The Washington Post "The most readable and provocative account of the consequences of the war on drugs since Michelle Alexander's *The New Jim Crow*" —The New York Times Book Review "Powerful . . . deeply

informed from a legal standpoint and yet in some ways still highly personal" —The Times Literary Supplement (London) With the eloquence of Ta-Nehisi Coates and the persuasive research of Michelle Alexander, a former federal prosecutor explains how the system really works, and how to disrupt it Cops, politicians, and ordinary people are afraid of black men. The result is the Chokehold: laws and practices that treat every African American man like a thug. In this explosive new book, an African American former federal prosecutor shows that the system is working exactly the way it's supposed to. Black men are always under watch, and police violence is widespread—all with the support of judges and politicians. In his no-holds-barred style, Butler, whose scholarship has been featured on 60 Minutes, uses new data to demonstrate that white men commit the majority of violent crime in the United States. For example, a white woman is ten times more likely to be raped by a white male acquaintance than be the victim of a violent crime perpetrated by a black man. Butler also frankly discusses the problem of black on black violence and how to keep communities safer—without relying as much on police. Chokehold powerfully demonstrates why current efforts to reform law enforcement will not create lasting change. Butler's controversial recommendations about how to crash the system, and when it's better for a black man to plead guilty—even if he's innocent—are sure to be game-changers in the national debate about policing, criminal justice, and race relations.

This simulating new reading of constructions of ethnicity in Malaysia and Singapore is an important contribution to understanding the powerful linkages between ethnicity, religious reform, identity and nationalism in multi-ethnic Southeast Asia. *Paradoxes of Mahathirism* Sterling Publishing Company, Inc. Malaysia's multicultural society supports one of the most dynamic economies in Asia. This completely revised new edition of the standard text, first published twenty years ago, traces the history of the country from early times to the present day. The authors give particular attention to the evolution of Malay politics and their close links with indigenous groups who lived on the oceans and in the deep jungles of the region, from Sumatra to Borneo. This provides the background to the establishment of the Malay port of Melaka, which was conquered by the Portuguese in 1511, foreshadowing the establishment of a British colonial regime in the late nineteenth century. Although the large numbers of

Chinese and Indian migrants who arrived to work in the tin and rubber industries contributed to economic expansion, colonial policies did not encourage communal interaction. The authors trace the process by which post-independence leaders in Malaya attempted to counter the legacy of ethnic hostility while answering Malay demands for an affirmation of their rights and a stronger commitment to Islam. The incorporation of the Borneo states of Sarawak and Sabah into the Federation of Malaysia in 1963 rendered the goal of welding a nation from areas that were geographically separated and culturally disparate even more problematic. The intense emotions attached to issues of race were made tragically evident in the racial riots of May 1969, which this book sees as a watershed in modern Malaysian history. As Malaysia enters the twenty-first century, the government is determined to oversee the transition to an economy focused on manufacturing and advanced technology, and to eliminate poverty and the association between occupation and race. While several recent studies deal with the impact of colonial rule and Malaysia's spectacular economic transition, this book is unique because it tracks developments from early times and identifies continuities as well as change. Combining the authors' specialist knowledge of precolonial sources with the most recent contemporary research, this new edition reinforces the position of *A History of Malaysia* position as a standard reference for all those interested in the historical processes which led to the emergence of this culturally varied and economically energetic country.

Burma is one of the largest and most richly endowed states in Southeast Asia. Yet it remains both economically and politically underdeveloped. Why is this so? This book argues that much of the reason has to do with an ongoing struggle for national identity. It is suitable for students and professionals interested in development studies.

Climate change is not a matter of gradually increasing temperatures. New scientific findings about how our planet works show that it does not do gradual change. Under pressure, it lurches into another mode of operation. Man-made global warming is on the verge of unleashing unstoppable planetary forces. Biological and geological monsters are being woken, and they will consume us. Virtually overnight Nature's revenge will be sudden and brutal, like a climatic tsunami sweeping across the globe. No question, we are the last generation to live with any kind of climatic stability. In this impassioned report, Fred Pearce travels the world on the story to end them all. Most troubling, while visiting the places where the action may start: deep in the Amazon, high in the Arctic and among the bogs of Siberia, he uncovers the first signs that nature's revenge is already under way.

Perjanjian Bangkok: Wacana Sejarah dan Persejarah

Princeton University Press

Burma has often been portrayed as a timeless place, a country of egalitarian Buddhist villages, ruled successively by autocratic kings, British colonialists and, most recently, a military dictatorship. *The Making of Modern Burma* argues instead that many aspects of Burmese society today, from the borders of the state to the social structure of the countryside to the very notion of a Burmese identity, are largely the creations of the nineteenth century - a period of great change - away from the Ava-based

polity of early modern times, and towards the 'British Burma' of the 1900s. The book provides a sophisticated and much-needed account of the period, and as such will be an important resource for policy makers and students as a basis for understanding contemporary politics and the challenges of the modern state. It will also be read by historians interested in the British colonial expansion of the nineteenth century.

A History of Malaysia Routledge

In *The Ritual Process: Structure and Anti-Structure*, Victor Turner examines rituals of the Ndembu in Zambia and develops his now-famous concept of "Communitas." He characterizes it as an absolute inter-human relation beyond any form of structure. The *Ritual Process* has acquired the status of a small classic since these lectures were first published in 1969. Turner demonstrates how the analysis of ritual behavior and symbolism may be used as a key to understanding social structure and processes. He extends Van Gennep's notion of the "liminal phase" of rites of passage to a more general level, and applies it to gain understanding of a wide range of social phenomena. Once thought to be the "vestigial" organs of social conservatism, rituals are now seen as arenas in which social change may emerge and be absorbed into social practice. As Roger Abrahams writes in his foreword to the revised edition: "Turner argued from specific field data. His special eloquence resided in his ability to lay open a sub-Saharan African system of belief and practice in terms that took the reader beyond the exotic features of the group among whom he carried out his fieldwork, translating his experience into the terms of contemporary Western perceptions. Reflecting Turner's range of intellectual interests, the book emerged as exceptional and eccentric in many ways: yet it achieved its place within the intellectual world because it so successfully synthesized continental theory with the practices of ethnographic reports."

The definitive, maximum-impact guide to using the transformative power of social media as the ultimate competitive advantage
About the Book In *The Hyper-Social Company*, Ed Moran of Deloitte and Francois Goissieux of BeelineLabs identify how (and which) social media are fundamentally changing core business processes and the way businesses and customers interact. These changes are being driven by what the authors call the "Hyper-Social Shift." Through interviews with more than 500 companies and studies of social media, Moran and Goissieux

have gained radical new insights into the advantages many businesses have derived from new technologies and practices. From these findings, the authors have developed self-analysis tools—including the Hyper-Sociality Index (HSI) profiled in this book—that leaders and managers can use to assess their enterprise's Hyper-Sociality; pinpoint which parts of their organization are ready to make the leap; and benchmark their progress against competitors, or against their industry as a whole.

Dr. Mahathir Mohamad, Prime Minister of Malaysia since 1981, is one of Asia's most successful politicians. Once feared by some as an ideologue of state intervention to restructure Malaysian society, Mahathir is now admired by many for his vision of industrializing his nation into Asia's 'fifth tiger.' *Paradoxes of Mahathirism* is the first full-length scholarly examination of the enigma of Mahathir. As a study of political ideology, it explores Mahathir's ideas on nationalism, capitalism, Islam, populism, and authoritarianism—the core of Mahathirism. Within the context of Malaysia's recent political history, it charts the evolution of Mahathir's complex world-view to reveal paradoxes, alternating patterns of consistency and contradiction, which help us understand his politics, policies, and personality.

In *On Western Terrorism* Noam Chomsky, world-renowned dissident intellectual, discusses Western power and propaganda with filmmaker and investigative journalist Andre Vltchek. The discussion weaves historical narrative with the two men's personal experiences, which have led them to a life of activism. Beginning with the New York newsstand where Chomsky first began his political education as a teenager, the discussion broadens out to the shifting forms of imperial control and the Western propaganda apparatus. Along the way Chomsky and Vltchek touch upon many countries of which they have personal experience, including Nicaragua, Cuba, China, Chile, and Turkey. A blast of fresh air which blows away the cobwebs of propaganda and deception, *On Western Terrorism* is a powerful critique of the West's role in the world and a testament to two lives dedicated to humanism, activism, and the search for knowledge.
