In hyperdrawing: beyond the lines of contemporary art, authors and artists come together to explore the potential of what drawing in contemporary art theory and practice might become. In this follow-up to 2007's drawing now: between the lines of contemporary art, Phil Sawdon and Russell Marshall, two of the current directors of TRACEY, curate contemporary drawing within fine art practice from 2006 through to 2010. Four essays and images from 33 international artists collectively explore the boundaries of the hyperdrawing space, investigating in essence what lies beyond drawing - images that use traditional materials or subjects whilst also pushing beyond the traditional, employing sound, light, time, space and technology. Over and above traditional views and practices, the authors and artists in this book recognise and embrace the opportunities inherent in the essential ambiguity of drawing. Practitioners of hyperreal works, 2D3D4D pieces and installations that push beyond photorealism all find their place within this new conception of hyperdrawing as techne, a productive space no longer limited by spatial boundaries. Artists including Catherine Bertola, Layla Curtis, Garrett Phelan, Suzanne Treister and Ulrich Vogl alongside the essays of Emma Cocker, Siun Hanrahan and Marsha Meskimmon provide a contemporary view in both visual and written form of how ambiguity can be used as a strategic approach in drawing research and practice. A gallery in book form, hyperdrawing takes drawing beyond the interaction of pencil and paper and traces contemporary adventures in multiple dimensions and alternate realities.

Drawing is experiencing an unparalleled surge in the art world. Passé notions that once defined drawing as being a preparatory stage for painting or sculpture have long since been cast aside. Drawing is now fully recognized as its own art form—in the biennials, art fairs, museum exhibitions, and beyond. Drawing has come of age. Contemporary artists are increasingly discovering that drawing is something unique and different from painting. It is an intense, sensitive, compelling, personal, and utterly direct art form, one with its own concepts, characteristics, and techniques. In addition, contemporary drawing is not governed by any particular imagery, but rather encompasses a variety of approaches, including realist, abstract, modernist, and post-modernist. Contemporary Drawing delves into the essential and far-reaching concepts of this medium, exploring surface,

mark, space, composition, scale, materials, and intentionality in turn. Key techniques, such as using nature to induce marks and working with a checklist to determine a drawing's problems, are introduced throughout. Plus, an in-depth chapter examines a number of artists, such as William Kentridge and Gego, who are breaking traditional boundaries that separate one artistic discipline from another. Lushly illustrated by a wide range of highly accomplished contemporary artists, Contemporary Drawing offers a broad perspective on this expansive and energized field of art.

Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act

demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Using close visual analysis of drawings, artist interviews, critical analysis and exegesis, Drawing Investigations examines how artists use drawing as an investigative tool to reveal information that would otherwise remain unseen and unnoticed. How does drawing add shape to ideas? How does the artist accommodate to challenges and restraints of a particular environment? To what extent is a drawing complementary and continuous with its subject and where is it disruptive and provocative? Casey and Davies address these questions while focusing on artists working collaboratively and the use of drawing in challenging or unexpected environments. Drawing Investigations evaluates the emergence of a way of thinking among an otherwise disconnected group of artists by exploring commonalities in the application of analytical drawing to the natural world, urban environment, social forces and lived experience. Examples represent a spectrum of research in international contexts: an oceanographic Institute in California, the archives of Amsterdam's Rijksmuseum, the Antarctic Survey, geothermal research in Japan and the Kurdish diaspora in Iraq. Issues are situated in the contemporary theory and practice of drawing including relationships to historical precedents. By exploring drawing's capacity to capture and describe experience, to sharpen visual faculties and to bridge embodied and conceptual knowledge, Drawing

Investigations offers a fresh critical perspective on contemporary drawing practice.

*A Companion to Contemporary Drawing* Tate

The first university-level textbook on the power, condition, and expanse of contemporary fine art drawing *A Companion to Contemporary Drawing* explores how 20th and 21st century artists have used drawing to understand and comment on the world. Presenting contributions by both theorists and practitioners, this unique textbook considers the place, space, and history of drawing and explores shifts in attitudes towards its practice over the years. Twenty-seven essays discuss how drawing emerges from the mind of the artist to question and reflect upon what they see, feel, and experience. This book discusses key themes in contemporary drawing practice, addresses the working conditions and context of artists, and considers a wide range of personal, social, and political considerations that influence artistic choices. Topics include the politics of eroticism in South American drawing, anti-capitalist drawing from Eastern Europe, drawing and conceptual art, feminist drawing, and exhibitions that have put drawing practices at the centre of contemporary art. This textbook: Demonstrates ways contemporary issues and concerns are addressed through drawing Reveals how drawing is used to make powerful social and political statements Situates works by contemporary practitioners within the context of their historical moment Explores how contemporary art practices utilize drawing as both process and finished artifact Shows how concepts of observation, representation, and audience have changed dramatically in the digital era Establishes drawing as a mode of thought Part of the acclaimed Wiley Blackwell Companions to Art History series, *A Companion to Contemporary Drawing* is a valuable text for students of fine art, art history, and curating, and for practitioners working within contemporary fine art practice.

Many of us want to learn "how to draw." But as artist Anthony Ryder explains, it's much more important to learn what to draw. In other words, to observe and draw what we actually see, rather than what we think we see. When it comes to drawing the human figure, this means letting go of learned ideas and expectation of what the figure should look like. It means carefully observing the interplay of form and light, shape and line, that combine to create the actual appearance of human form. In *The Artist's Complete Guide to Figure Drawing*, amateur and experienced artists alike are guided toward this new way of seeing and drawing the figure with a three-step drawing method. The book's progressive course starts with the block-in, an exercise in seeing and establishing the figure's shape. It then build to the contour, a refined line drawing that represents the figure's silhouette. The last step is tonal work on the inside of the contour, when light and shadow are shaped to create the illusion of form. Separate chapters explore topics critical to the method: gesture, which expresses a sense of living energy to the figure; light, which largely determines how we see the model; and form, which conveys the figure's volume and mass. Examples, step-by-steps, and special "tips" offer helpful hints and practical guidance throughout. Lavishly illustrated with the author's stunning artwork, *The Artist's Complete Guide to Figure Drawing* combines solid instruction with thoughtful meditations on the art of drawing, to both instruct and inspire artists of all levels.
