From the rivers and streams to the mighty ocean, God filled the Earth's waters with animals great and small. Upon His Word, enormous whales sprung into being. At His command, billions of plankton leapt to life. On that day, millions of creatures like the strapping sea turtles, the skulking sharks, the delightful dolphins, and

the soaring squid gladly joined their fellow sea animals. How joyously crammed with excitement was the fifth day of earth's existence.

Apologia's newest elementary science book will take you and your family on an exploration into the wonders of the swimming creatures made on the fifth day of Creation. You'll begin with a big splash from the whales and dolphins, then spy on seals and meet manatees before swimming with the sea turtles, snakes, and salamanders. You'll even peek in on the primeval plesiosaurus and its pals. Following your frolic with fish and sharks, you'll uncover the world of crabby crustaceans, sea snails, clams, and their soft bodied friends like the octopus, squid, and nautilus. You'll consort with corals, find flowers that devour plankton, see stars and feathers that walk, leap and roll, and discover dollars that disappear in the sand and sponges that clean more than you might think. From the microscopic to massive, no stone is left unturned in your student's passage through the waters of the world. The creatures your student studies will come to life as

your student creates replicas of them and adds them to his Ocean box - a miniature hand-crafted aquarium. As always, each lesson ends with an experiment or project reinforcing the scientific method and the concepts studied. Among other experiments and projects, your student will try on blubber, investigate a shark's ability to sense electrical currents, explore how whales can hear sounds that come from far away, and learn through experimentation which creatures make the best fossils. No matter how near or far you live from the ocean, you and your students will wonder at God's design in the amazing aquatic animals He formed and fashioned on the fifth day. Slip on your scuba gear, and come explore with us!

Zoo Animals Coloring Book Frances Lincoln Children's Books
A fascinating, interactive coloring book for herpetology students as

well as readers and artists fascinated by reptiles, illustrated with more than 85 black-and-white line drawings and also includes the anatomy and physiology of each group of reptiles. The Reptiles Coloring Book is a comprehensive compendium of both known and obscure reptiles, including turtles, crocodilians, snakes, lizards, and tuataras, as well as their extinct relatives. Inside, you'll find dozens of black-and-white line illustrations to color, accompanied by full-color photographs and detailed facts on each creature, including information about reproduction, anatomy, venom production, behavior, thermal shuttling, hibernation, vision, defensive behavior, conservation, and much more. The Reptiles Coloring Book uses Coloring Concepts Inc.'s unique methodology for kinesthetic learning, which involves physically interacting with a subject to facilitate understanding. Kinesthetic techniques are used in combination with visual and or auditory study techniques, producing multi-sensory learning. The Reptiles Coloring Book comes

complete with a handy Table of Contents, index, glossary, and references, and a full-color photo insert. This intriguing presentation utilizing expertly designed illustrations on the subject is not only informative, but provides an introductory education for anyone interested in reptiles and their characteristic lifestyles.
