U. S. Coins, 1994** Dell

Volume #20 in Whitman's best-selling Bowers Series covers three classic U.S. coin denominations: the dimes, quarters, and half dollars designed by Charles E. Barber, chief engraver of the U.S. Mint. These classic silver coins were first made

in 1892, and their production lasted to the eve of America's entry into World War I. In this colorfully illustrated book, the workhorses of late-19th and early-20th-century American commerce are given the famous Q. David Bowers treatment: insightful study, rich historical background, and detailed data analysis. Bowers lays out everything you need to know to be a smart collector. You'll learn the backstage goings-on that led to the coins' creation, why they barely made a splash when first issued, and why they weren't mourned when they passed into history. In recent years the scene has changed Barber's silver coinage is among the more popular of U.S. series, with many enthusiasts. House of Collectibles

Whitman Publishing

"Junk silver" is a term to describe U.S. dimes, quarters, and half dollars that were minted in 1964 and earlier, as well as various other U.S. coins, because they

are composed of between 35% and 90% silver, while newer and current coins are composed of the much cheaper base metals copper and nickel. This comprehensive book covers everything you need to know about U.S. junk silver coins, from the history of how and why the Government made the switch away from silver, to the many benefits of holding junk silver today. In addition, you'll learn crucial information including: how wear and condition affect the silver content of coins, how to detect counterfeits, how to buy and sell junk silver coins wisely, and much, much more. The 2nd edition has new and updated material throughout the book, as well as several new chapters, including information on Canadian junk silver coins, and U.S. base metal

coinage.
