Preventing School Violence The European Union as an Area of Freedom, Security and Justice  
Policing the Open Road examines how the rise of the car, that symbol of American personal freedom, inadvertently led to ever more intrusive policing--with disastrous consequences for racial equality in our criminal justice system. When Americans think of freedom, they often picture the open road. Yet nowhere are we more likely to encounter the long arm of the law than in our cars. Sarah Seo reveals how the rise of the automobile transformed American freedom in radical ways, leading us to accept--and expect--pervasive police power. As Policing the Open Road makes clear, this expectation has had far-reaching political and legal consequences.--

Most major crime in this country emanates from two major data sources. The FBI's Uniform Crime Reports has collected information on crimes known to the police and arrests from local and state jurisdictions throughout the country. The National Crime Victimization Survey, a general population survey designed to cover the extent, nature, and consequences of criminal victimization, has been conducted annually since the early 1970s. This workshop was designed to consider similarities and differences in the methodological problems encountered by the survey and criminal justice research communities and what might be the best focus for the research community. In addition to comparing and contrasting the methodological issues associated with self-report surveys and official records, the workshop explored methods for

obtaining accurate self-reports on sensitive questions about crime events, estimating crime and victimization in rural counties and townships and developing unbiased prevalence and incidence rates for rate events among population subgroups.

Research Methods in Crime and Justice, 2nd Edition, is an innovative text/online hybrid for undergraduate Criminal Justice Research Methods courses. This material uniquely addresses the fundamental teaching issue for this course: how to show students that success as criminal justice practitioners is linked to their acquisition of research skills. Brian Withrow, a widely published academic researcher and former Texas State Trooper, developed this approach for his own undergraduate Research Methods class. He persuasively demonstrates that research skills aren't just essential to university academic researchers but to successful criminal justice practitioners as well. More than 80 short, sharply focused examples throughout the text rely on research that is conducted by, on behalf of, or relevant to criminal justice practitioners to engage students' interest like no other text of its kind.

Extensive web materials all written by the author provide an array of instructor support material, including a Researcher's Notebook that provides students (and their instructors) with a series of structured exercises leading to the development of a valid research project. Withrow systematically walks students through defining a question, conducting a literature review, and designing a research method that provides the data necessary to answer the research question—all online, with minimal instructor supervision. The

second edition features expanded coverage of measurement, qualitative research methods, and evaluation research methods, as well as additional downloadable journal articles to ensure students begin to think critically about research and can read scholarly literature.

license. While the Nordic countries are listed at the top in most international rankings of gender equality and citizens' feelings of security, studies on the prevalence of sexual victimisation present a different picture, suggesting that the very countries that have invested much in establishing gender

equality actually see a high prevalence of sexual violence. This book sheds light on the phenomenon and construction of rape and other forms of sexual violence within the Nordic region, exploring the ways in which rape and sexual violence are dealt with through criminal law and considering governmental policies aimed at combatting it, with a special focus on legal regulations and developments. Thematically organised, it offers new research on perpetrators, victimhood, criminal justice and prevention. Multi-disciplinary in approach, it brings together the latest work from a range of scholars to offer insights into the situation in the five Nordic countries, asking how and why rape and other forms of sexual violence occur, whilst also addressing the timely issues of online sexual cultures, BDSM and the grey areas of sexual offences. As such, it will appeal to scholars of sociology, criminology and law with interests in gender and sexual violence.

Historical Origins of International Criminal Law Maklu

A new approach for studying the interaction between international and domestic processes of criminal law-making in today's globalized world.

### **The Oxford Handbook of Criminal Law** Routledge

A step-by-step lab manual for understanding criminal justice research. *Research Methods in Crime and Justice* Oxford University Press

The power of the modern prosecutor arises from several features of the criminal justice landscape: widespread use of law and order political rhetoric and heightened fear of crime among voters; legislatures' embrace of extreme sentencing ranges to respond to such concerns; and the uncertain or limited accountability of prosecutors to the electorate, the bar, or other political and professional constituencies. The convergence of these trends has transformed prosecution into an indispensable field of study. This volume brings together the work of leading international scholars across criminology, sociology, political science, and law - along with contributions from reform-minded practitioners - to examine a variety of issues in prosecutorial behaviour and the institutional structures that frame their behavior. The Handbook connects the dots among existing theoretical and empirical research related to prosecutors. Major sections of the volume cover (1) prosecutor performance during distinct phases of a criminal case, (2) the features of the prosecutor's environment, both inside the office and external to the office, that influence the choices of individual prosecutors and office leaders, and (3) prosecutorial strategies and priorities when dealing with specialized types of crimes, victims, and defendants. Taken together, the chapters in this volume identify the founding texts, discuss leading theoretical and methodological approaches, explain the scope of

unresolved issues, and preview where this field is headed. The volume provides a bottom-up view of an important new scholarly field.

The SAGE Guide to Writing in Criminal Justice Research Methods equips students with transferable writing skills that can be applied across the field of criminal justice—both academically and professionally. Authors Jennifer M. Allen and Steven Hougland interweave professional and applied writing, academic writing, and information literacy, with the result being a stronger, more confident writer, researcher, and student in criminal justice. Focused on teaching students how to write in the academic setting while introducing them to a number of other writing tools specific to research methods, such as writing literature reviews, abstracts, proposals, and more. The perfect companion for any criminal justice research methods course, this brief text focuses on key topics that will benefit students in their classes and in the field.

In today's globalized society, an international exchange of ideas and views is indispensable within the field of social sciences, including criminology and criminal justice studies. The research group Governance of Security (GofS) fosters contemporary international discourses on issues of crime and crime control. In 2008, GofS started a research paper series, combining theoretical and empirical articles on issues reflecting the research activities of GofS. This research group is a collaboration between Ghent University and Ghent University College in Belgium. GofS concentrates its

research around the study of administrative and judicial policy that have been developed with respect to new issues of crime and insecurity. The GofS series 'Governance of Security Research Papers (GofS)' is published by Maklu Publishing (Belgium). Readings on Criminal Justice, Criminal Law and Policing Volume 2 of GofS's series Governance of Security Research Papers includes the following: Punishment across Borders: The Rationales behind International Execution of Sentences; Interpreting the Concept of 'Discretionary Power' within the Execution of Sentences: A Comparison between the Belgian and French Situation; Esperanto for EU Crime Statistics: Towards Common European Offense Definitions in an EU-level Offense Classification System; Developing a Framework for the Legal Rights of Victims and Witnesses; What Can European Institutions and the International Criminal Court Learn from Each Other?; Purpose Limitation in EU-US Data Exchange in Criminal Matters: The Remains of the Day; Some Criminal Law Reflections on the Sexual Transmission of HIV; Reading about Crime in Post-Intervention Societies: A Critical Assessment; Policing and Leadership: The Case of the Belgian Chiefs of the Local Police; Reflections on the Possible Integration of Intelligence-Led Policing into Community Policing: The Belgian Case; Reliability and Correlational Validity of Police Interview Competences: Assessing the Stability of the Police Interview Competency Inventory; The Role of Europol in Joint Investigation Teams: A Foretaste of an Executive European Police Office?; Checking Aspects of a "Nodal Orientation" for Policing the Port of Antwerp.

The National Institute of Justice, the agency established by Congress to carry out that mission, has for the past three decades been seeing the returns on that investment multiply. Criminology has become a respected field of scholarly inquiry, and we have built an impressive body of knowledge that has helped us better understand criminal behavior and the justice system. More important, the results of scholarly inquiries have been and are being applied to the day-to-day operations of law enforcement, corrections, the courts, and other elements of the justice system. In the conference, which revisited the Commission with the theme "Enhancing Policy and Practice Through Research," we saw how the investment continues to yield returns. The plenary sessions in particular emphasized praxis-research put to the service of real-world situations.

We live in an era of mass mobility where governments remain committed to closing borders, engaging with securitisation discourses and restrictive immigration policies, which in turn nurture xenophobia and racism. It is within this wider context of social and political unrest that the contributors of this collection reflect on their experiences of conducting criminological research. This collection focuses on the challenges of doing research on the intersections between criminal justice and immigration control, choosing and

changing methodologies while juggling the disciplinary and interdisciplinary requirements of the work's audience. From research design, to fieldwork to writing-up, this book captures every part of the research process, drawing on a range of topics such as migration control, immigrant detention and border policing. It also reflects on more neglected areas such as the interpersonal and institutional contexts of research and the ontological and epistemological assumptions embedded within data analysis methods. It makes a significant contribution to our understanding of the major developments in current research in this field, how and why they occur and with what consequences. This book seeks to shake off the phantom of undisturbed research settings by bringing to the fore the researchers' involvement in the research process and its products. An interdisciplinary collection, it can be used as a reference not just for those interested in the criminology of mobility but also as a learning tool for anyone conducting research on a highly charged topic in contemporary policy and politics.

This report describes some of the National Institute of Justice's (NIJ) successful research projects, summarizes their findings, and discusses their influence on criminal justice policy and practice. The study considers whether the research has (1) addressed issues and problems that are central and critical to criminal justice policy and practice, (2) affected law enforcement and other functions of the system, and (3) ultimately helped improve the system's effectiveness in dealing with crime and criminals. The author asked NIJ staff to nominate research efforts

that, in their opinion, had influenced policy and practice in the last two decades and then interviewed high-level managers and policymakers about their knowledge and use of the research. Finally, she reviewed the relevant criminal justice literature to see whether the changes in the field reflected or paralleled directions suggested by the research. The study indicates that research has indeed helped shape the way criminal justice policymakers and practitioners think about issues, how they identify problems that need attention, which alternatives they consider for dealing with their problems, and their sense of what can be accomplished.
